IOWA UNIFORM CRIME REPORTS

1979

ANNUAL RELEASE

VOLUME I

ANALYSIS OF JURISDICTIONAL DATA ON
CRIMES REPORTED, ARRESTS, AND ASSAULTS
ON OFFICERS

IOWA DEPARTMENT OF **public * safety**

ROBERT D. RAY
GOVERNOR

WILLIAM D. MILLER
COMMISSIONER

This is the fourth annual Iowa Uniform Crime Reports prepared and released by this Department. This volume generally retains the format of last year's report, with two major exceptions.

Questions have been raised in recent years regarding possible changes in the Uniform Crime Reports system. In response to these concerns, arson and farm theft have received more detailed treatment in this year's report than in prior ones.

Arson is included in the analysis of Part I crime in Chapter II for the first time. While Congress mandated inclusion of Arson as a Part I crime in 1979, the Department of Public Safety had anticipated this change several years earlier. The decision to collect and report arson data in Iowa was made in 1977.

My sincere thanks and appreciation goes to the 224 local law enforcement agencies contributing statistics for this report. The excellent cooperation we have received from local departments has facilitated the preparation of this report.

Although this report has been constructed to facilitate comparisons between and among jurisdictions, one should take caution in comparing the crime problems of different areas, even when jurisdictions possess similarity in population, geography, or other characteristics. Crime statistics can be affected by so many variables that a seemingly valid comparison may in fact be significantly biased. Local law enforcement officials are best suited to assess the data for their agency, and those desiring such an assessment should contact the appropriate city or county law enforcement administrator.

Sincerely,

William D. Miller
WILLIAM D. MILLER
Commissioner

I. INTRODUCTION

A. Background

The 65th Iowa General Assembly enacted into law Chapter 749B of the Iowa Code requiring law enforcement agencies to submit reports of crime and arrests to the Bureau of Criminal Investigation. The following is a reprint of a portion of this law (now Section 692.15 of the Code) concerning Uniform Crime Reports.

> When it comes to the attention of a sheriff, police department, or other law enforcement agency that a public offense has been committed in its jurisdiction, it shall be the duty of the law enforcement agency to report information concerning such crimes to the bureau on a form to be furnished by the bureau not more than thirty-five days from the time the crime first comes to the attention of such law enforcement agency. These reports shall be used to generate crime statistics. The bureau shall submit statistics to the governor, legislature and crime commission on a quarterly and yearly basis.

During December 1974, the Iowa Bureau of Criminal Investigation, assisted by the Federal Bureau of Investigation, conducted schools throughout the State in the proper completion of Uniform Crime Reports. The schools were attended by most law enforcement agencies that were to contribute Uniform Crime Reports. On January 1, 1975, the Iowa Uniform Crime Reporting program was implemented, with forms being sent to 210 agencies. Forms provided by the Federal Bureau of Investigation were used in implementing this program since most contributing agencies had previously submitted these forms to the FBI. Monthly reports were received from 209 agencies throughout 1975 and 1976. In 1977, the number of agencies submitting reports grew to 220, which remained the case in 1978. In 1979, the number of reporting agencies rose to 223, with three agencies being added.[1] Since 1977, all reporting agencies have submitted complete data.

---

[1] The three new agencies are the Johnston and Story City Police Departments and the Security Department of the University of Northern Iowa.

In 1977 the responsibility for Uniform Crime Reports was transferred from the Bureau of Criminal Investigation to the Department of Public Safety's Administrative Services Division (which maintains UCR field personnel, receives raw data from contributing agencies, and performs computer analysis of data) and the Research and Development Bureau (which further analyzes data, prepares the quarterly and annual reports, and responds to information requests). Questions concerning this report or addressing the topic of crime in Iowa should be addressed to the latter.

B. Method of Reporting

Iowa sheriffs' offices and police departments each month report the offenses, arrests and clearances known to them within their jurisdictions. Crimes handled by State and Federal agencies are reported by the local jurisdictions in which the crimes have occurred. County sheriffs report activity occurring outside the jurisdiction of direct contributing police departments. With few exceptions, those police departments which contribute directly are in communities having populations of 2,500 or greater.

C. Offense Classifications

The Iowa Department of Public Safety forwards Iowa crime figures to the Federal Bureau of Investigation for development of nationwide statistics. Because the national program receives reports from law enforcement agencies throughout the nation, uniformity of classification and reporting procedures are necessary to overcome variations in the definitions of criminal offenses among states. For this reason, UCR definitions do not necessarily conform to the definitions set forth in the Code of Iowa.

The criminal offense information contained in the Uniform Crime Reports is divided into Part I and Part II Crimes. Part I Crimes are generally those crimes that are considered most serious in nature, occur with regularity, and are most frequently reported to law enforcement agencies. For the purpose of analysis, Part I Crimes are further divided into violent and property crimes:[2]

Violent Crimes

Murder - the willful, non-negligent killing of one human being by another.

Forcible Rape - the carnal knowledge or attempted carnal knowledge of a female forcibly and against her will.

Robbery - the taking or attempting to take anything of value from the care, custody or control of a person or persons by violence or by putting the victim in fear.

Aggravated Assault - an unlawful attack or attempt by one person upon another for the purpose of inflicting severe or aggravated bodily injury.

Property Crimes

Burglary - Breaking or Entering - the unlawful entry or attempted entry of a structure to commit a felony or a larceny.

Larceny (except motor vehicle thefts) - the unlawful taking of property from the possession or constructive possession of another.

Motor Vehicle Theft - the theft or attempted theft of a motor vehicle. Farm equipment, construction equipment, boats and airplanes are specifically excluded from this category and are included under larceny.

Arson - the willful or malicious destruction or attempted destruction of property by fire.

The inclusion of arson in the Part I category necessitates a distinction between index crime and Part I crime. Figures for "index crime" include the seven categories of murder, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft, but not arson. This allows for comparisons of the index crime rate with previous years.

Part II crimes are all those not included in the Part I category. Figures for Part II crimes reported to police are not provided in the UCR system, as is the case for Part I crimes. Arrests for Part II crimes are included; however, most reports of crime deal exclusively with Part I crimes, and these receive primary attention here.

---

[2] These are also frequently called "crimes against persons" and "crimes against property", respectively. Further explanation of crime categories and scoring of offenses can be obtained in UCR publications of the Federal Bureau of Investigation.

D. Methodology

Contributing agencies submit monthly crime reports to the Department of Public Safety usually within approximately ten days of the end of the month. In instances in which incomplete or erroneous reports are received, corrected reports are normally submitted within approximately one month following the month in question. The Data Services Bureau monitors agency submissions and exerts considerable effort to achieve 100% reporting.

In the case of past annual reports, estimations have been developed for agencies for which complete data have not been received for a given year, with estimates based whenever possible upon the monthly reports which have been provided. No estimations have been required since 1976, as all agencies reported in each month during each of the past three years.

Upon receipt of the 1979 annual printout, the Research and Development Bureau of the Department of Public Safety commenced analysis of the data. Initial steps involved inspection of the data to locate inaccuracies which might necessitate alteration of figures. Because of the excellent performance of the Data Services Bureau, little alteration was necessary.

Following this inspection, all agencies within a population category were rank ordered according to offenses reported, rates per 100,000 population, and clearance rates. The same process occurred for counties and SMSAs. A majority of the time devoted to analysis was spent on three tables in the printout, those dealing with reported crime by agency, the monthly trend of offenses, and reported crime and clearance rates by population groups.

Since the bulk of this report is made up of tables, considerable effort has been made 1) to make the tables understandable, 2) to put them in the most logical format and 3) to make them useful to local law enforcement officials and others who might find them of use. Liberal use has been made of graphs to visually portray the more significant results in the tables. Because of Iowa's strong county orientation, an attempt has been made to permit easy comparison between and among counties and law enforcement agencies. While such comparisons should be made with care, they should permit a rapid understanding of crime patterns within the State, as well as by county and jurisdiction.

The rank-ordering included here is not done to point out communities and agencies with either "good" or "bad" crime or arrest rates. Rather, it was done as a service, and because agencies and the news media are likely to compare jurisdictions regardless of the manner in which the data are presented. Those constructing this report felt an obligation to facilitate comparison and to ensure that such comparisons are accurately made.

The organization of this report runs generally from large jurisdictions to small, beginning with analysis of State level data in which individual jurisdictions are not identified. The second portion of the report deals with jurisdictional information, beginning with counties and Standard Metropolitan Statistical Areas (both of which in most instances include more than one jurisdiction), and then moving to individual large cities down to the smaller rural areas. To assist understanding of the city and county groupings included here, the following definitions are presented:

Standard Metropolitan Statistical Areas (SMSAs) - areas including a core city of at least 50,000 population, and frequently consisting of additional smaller surrounding jurisdictions. Johnson County, with Iowa City designated as the core city is also an SMSA.

Suburban Cities - cities of less than 50,000 population in Standard Metropolitan Statistical Areas, other than Iowa City. In this volume, in addition to the cities fitting that definition, two cities which would otherwise be likely to be classified as "suburban" are also included in some suburban tables, and noted when appropriate. These two cities are West Burlington and Camanche.

Suburban Areas - all jurisdictions (including the sheriff) within an SMSA with the exception of the core city.

Rural Areas - those areas in non-SMSA counties which are served by the county sheriff or other agencies which do not report directly to the Uniform Crime Reporting system.

Suburban Sheriffs - county sheriffs in SMSA counties.

Non-Suburban Cities - all cities outside of SMSAs.

University Police - university campus security departments reporting independently of local city police. For 1979 this category includes the State University of Iowa, Iowa State University, and the University of Northern Iowa. In 1977, only Iowa State University was included, the State University of Iowa was added in 1978, and the University of Northern Iowa this year.

Several methods can be used to check the accuracy of "crimes reported" categories by using city and county groupings. The total crimes reported for all cities, for example, should be the sum of crimes reported for suburban cities and non-suburban cities. The state total of crimes reported can be reached in several ways:

1. Adding the SMSA total to the non-suburban city total, the rural areas total, and the university police total.
2. Adding the city total to the suburban sheriffs, rural areas, and university police totals.

Where suburban and non-suburban cities are broken down by population (e.g., cities from 5,000-10,000), adding comparable suburban and non-suburban groups should yield the state total for that particular group.

In addition to listing cities by population, the total population of each city or county group is also presented in all tables containing the number of crimes reported. This step was taken to assist in checking population figures and to provide the reader with the means to check crime rate tables and, if desired, construct tables not presented here. Say, for example, that one wishes to know the difference in crime rate for all suburban cities under 10,000 in population and comparable non-suburban cities. After finding the number of crimes reported in the 5,000-10,000 population categories and the under 5,000 population categories, one could then use the listed populations in determining the rates:

Crimes reported, non-suburban cities less than 5,000 : 4,076
Crimes reported, non-suburban cities 5,000-10,000 : 8,488
Total Crimes reported, non-suburban cities less than 10,000: 12,564

Crimes reported, suburban cities less than 5,000 : 1,414
Crimes reported, suburban cities 5,000-10,000 : 687
Total Crimes reported, suburban cities less than 10,000 : 2,101

Population, non-suburban cities less than 5,000 : 147,049
Population, non-suburban cities 5,000-10,000 : 247,507
Total Population, non-suburban cities less than 10,000 : 394,556

Population, suburban cities less than 5,000 : 34,156
Population, suburban cities 5,000-10,000 : 18,700
Total Population, suburban cities less than 10,000 : 52,856

12,564 ÷ 394,556 x 100,000 = 3,184.3 Non-Suburban Rate
2,101 ÷ 52,856 x 100,000 = 3,975.0 Suburban Rate

The table construction in this report is designed to facilitate such comparisons.

E. Factors Related to Crime

Caution should be exercised in making direct comparisons of crime and arrest data reported by different law enforcement agencies. Crimes reported relate to events while arrests relate to persons. A single reported offense may involve several crimes, several offenders, and several victims. Many arrests may involve only one such offense. Listed below are some additional conditions which can affect the crime and arrests that occur in different jurisdictions. The same conditions may also affect the amount and type of crime reported.

1. Density of population and geographic size of community.
2. Composition of the population with reference particularly to sex, age and race.
3. Economic status and mores of the population.
4. Mobility of the population.
5. Climate.
6. Educational, recreational, and religious characteristics.

7. Policies, effective strength, and standards governing appointment to law enforcement agencies.
8. Policies of the prosecuting officials, courts and correctional agencies.
9. Attitudes of the public toward crime and law enforcement agencies.
10. The degree to which law enforcement agencies adhere to crime reporting standards.

F. Limitations of this Report

Limitations of the Uniform Crime Reporting System have been debated extensively. Relying primarily on the reports of citizens, the figures included in Uniform Crime Reports reflect wide variations in the tendency of citizens to report crimes. Citizens may not report all crimes to law enforcement agencies, believing that there is nothing the police can do, fearing retaliation from offenders or embarrassment in revealing their own involvement in the offense or in other crimes.

The degree to which crimes are reported by citizens varies considerably from offense to offense and from area to area. Based on victimization survey studies completed in metropolitan areas, the percentage of actual crimes reported to law enforcement agencies is related to such factors as:

1. the seriousness of the crime and/or value of goods lost;
2. the victim's perception of the likelihood of apprehending the suspect;
3. the presence or absence of insurance on property.

Data from victimization surveys indicates that reporting rates may be as low as one in five for some crimes (e.g. larceny). Thus, the Uniform Crime Reports do not contain a complete accounting of crime within jurisdictions. However, the UCR system constitutes the best network of State and national crime figures currently available.

The UCR system has been developed to serve as a tool to assist jurisdictions obtain comparative information which can assist in allocation of personnel, budgeting, deployment of resources, and the like. Under ideal circumstances, the system can be of great benefit to criminal justice agencies, other public and private agencies, and to citizens. As in other such systems, however, accuracy of data rests upon proper use of the system. Misuse of the system is possible, and can affect accuracy of the data.

A likely source of inaccuracy has been the inadequacy of record-keeping systems in past years. Within the past decade, dramatic improvements in law enforcement record-keeping and reporting systems have occurred which have likely had a considerable effect on the amount of crime reported within some jurisdictions. While major metropolitan areas were in the forefront of this improvement -- obtaining sophisticated computer systems to record and keep track of crimes reported -- since the development of the Iowa UCR system the most notable changes have been observed in some of the smaller jurisdictions, particularly in rural areas. It is in these areas that crime typically has not been a major problem and that the necessity for accurate record-keeping has in the past been least apparent.

Although conclusive information on the subject is not available, it is possible that at least a portion of the increase in crime reported during the past few years is due to improvements in record-keeping, particularly in the rural areas. Further, because these rural jurisdictions started with low levels of crime -- both in raw numbers and rate per population -- large percentage increases can take place without great numerical increases.

Changes in crime rates can be affected by fluctuations which may be due to improvements or deterioration in record-keeping or to probability. Statistical theory indicates that the smaller the number in a sample - e.g., the smaller the number of reported crimes in a jurisdiction in a given year - the more susceptible the same is to great variation in mean (average) and standard deviation. What this means, in layman's terms, is that the reported crimes in smaller jurisdictions will vary more from year to year -- without necessarily showing a trend -- than will reported crimes in larger jurisdictions containing more crime.

While this report contains information both on the raw number of crimes reported and the rate of crime per 100,000 population, more attention has been given to rates per population than to raw figures. The latter are significantly affected by population, even within groupings of cities of similar sizes. Comparing figures for Davenport and Waterloo, both cities in the 50,000+ population category, provides an example of the different impressions one can receive from raw crime data and crime rates. Davenport reported 6,563 Part I offenses during 1978, which is 11.7% more than the 5,876 reported by Waterloo. However, Davenport's population is 101,459, compared to 73,064 for Waterloo. Davenport's crime rate during 1978 was 6,468.6 per 100,000 persons while Waterloo's crime rate was 8,042.3 per 100,000 population. Waterloo's crime rate was 24.3% higher than Davenport's, although Davenport had more reported crime.

II. STATE LEVEL DATA AND ANALYSIS

A. Total Crimes Reported*

There were 124,873 Part I crimes reported to Iowa law enforcement agencies in 1979, up from 115,348 in 1978. This is an increase of 8.3%. Both violent crime and crimes against property increased, with reported violent crime going from 4,672 in 1978 to 5,258 in 1979, a rise of 12.5%. Property crime rose 8.1%, from 110,676 to 119,615.

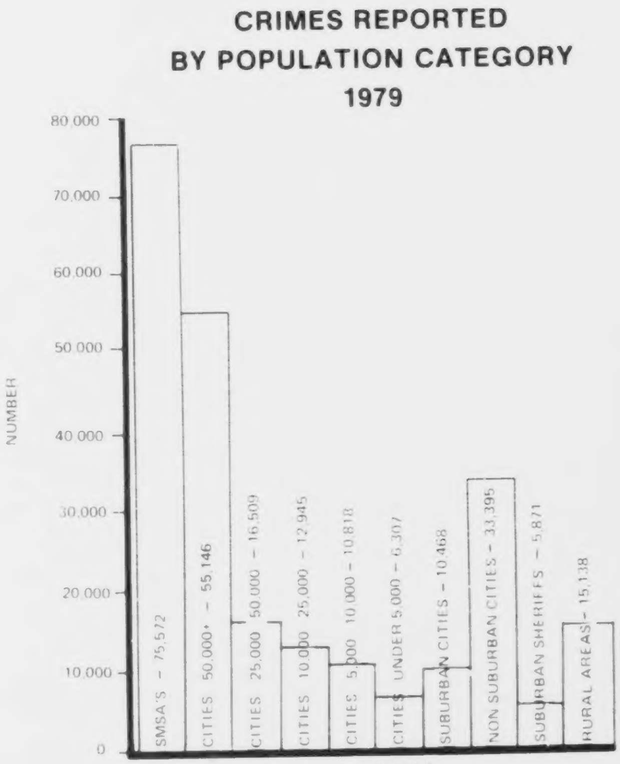

FIGURE 1

Table I presents information on offenses known to law enforcement agencies for each category of Part I crime, by population categories. This information, for total index crimes reported, is visually depicted in Figure 1. The data show that a substantial majority of reported crime in Iowa (81.4%) occurred in cities, with only 12.1% being reported from rural areas in the state. Crime in the eight metropolitan areas in the state -- Polk/Warren Counties (Des Moines), Linn County (Cedar Rapids), Pottawattamie County (Council Bluffs), Woodbury County (Sioux City), Black Hawk County (Waterloo and Cedar Falls), Dubuque County (Dubuque), Scott County (Davenport) and Johnson County (Iowa City) -- accounted for 60.5% of the total. Of this, the central cities (cities over 50,000 and Iowa City) contributed 46.3% of the state's total reported index crime, suburban cities 8.4%, and suburban sheriffs jurisdictions 4.7%. Other (non-suburban) cities accounted for 26.7% of the state's total.

---

*Discussions of reported crimes in this volume are restricted to the seven categories of Part I crime as defined by the FBI. Arson is discussed separately, and is not included in the "Part I" or "index" figures shown here.

B. Total Crime Rate

Looking at the state's crime rate, there were 4,301.2 reported index crimes in Iowa per 100,000 population during 1979. This was an increase of 8.1% from the 1978 rate of 3,980.6 crimes per 100,000 persons. The violent crime rate rose 12.3%, while the property crime rate climbed 7.9%. These figures are presented in Table II, which shows crime rates by population groupings, along with percentages changes between 1978 and 1979.

Figure 2 visually portrays the total 1979 crime rate by population grouping. It shows that, generally speaking, the larger the city, the higher the crime rate. This is in line with findings presented in earlier annual reports. Rural areas have the lowest crime rate of all population groupings, which is also a pattern continued from past years. On the whole, suburban cities had a higher crime rate than non-suburban cities, which is a reversal of the pattern found in prior years.

COMPARISON:
SUBURBAN AND NON-SUBURBAN CITIES CRIME RATES BY POPULATION GROUPS
1979

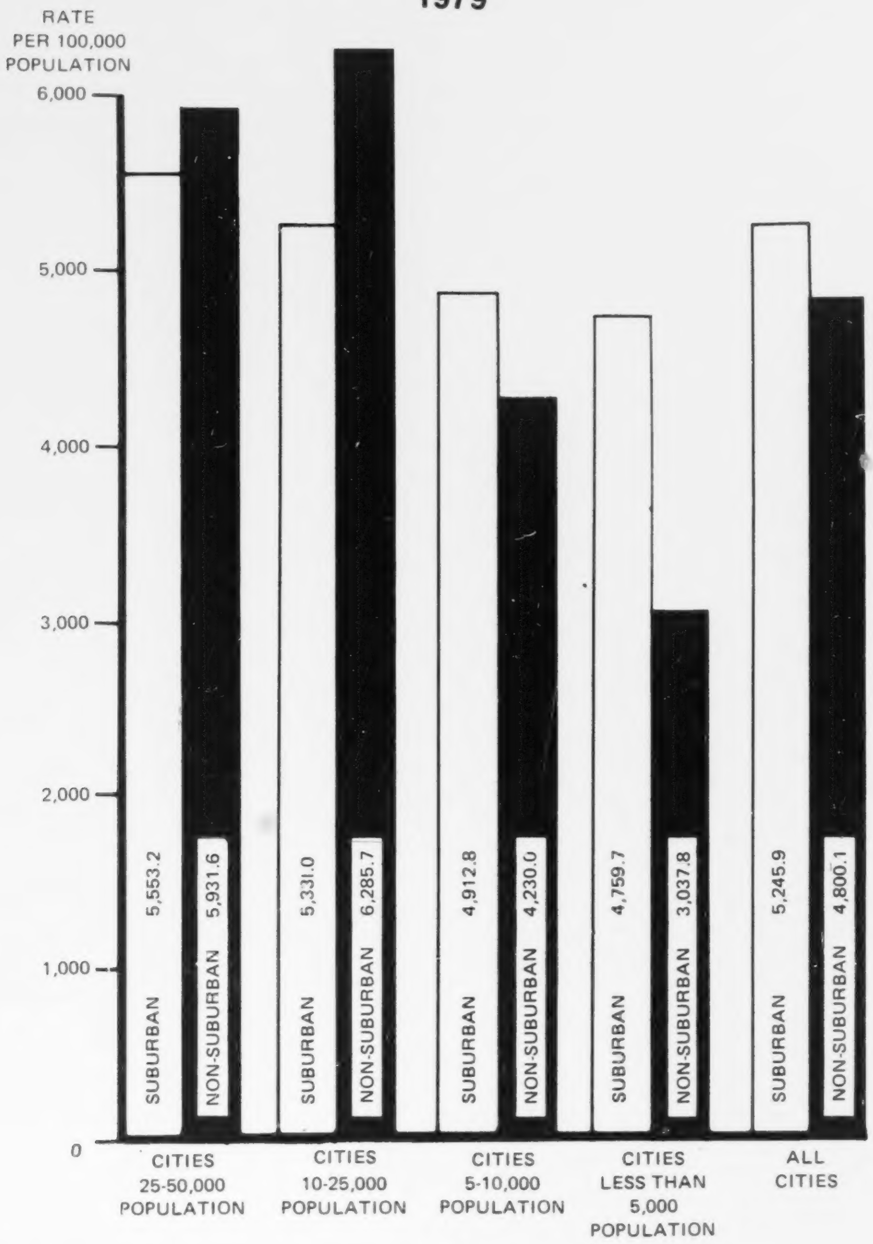

FIGURE 3

Figure 3 further illustrates the relationship between suburban and non-suburban city crime rates. In the two largest categories, cities 25,000 to 50,000 population and 10,000 to 25,000 population, non-suburban cities have the higher crime rates.

However, among cities in the 5,000 to 10,000 population category and among those in the under 5,000 population category, suburban cities had the higher rates. Further, it can be seen from Table II that, in every population group, non-suburban cities' crime rates increased significantly more between 1978 and 1979 than did the rates for comparable suburban cities. This was a reversal of the 1977 to 1978 pattern.

CHANGES IN CRIME RATE, 1978-79, BY POPULATION CATEGORY, IN PERCENT

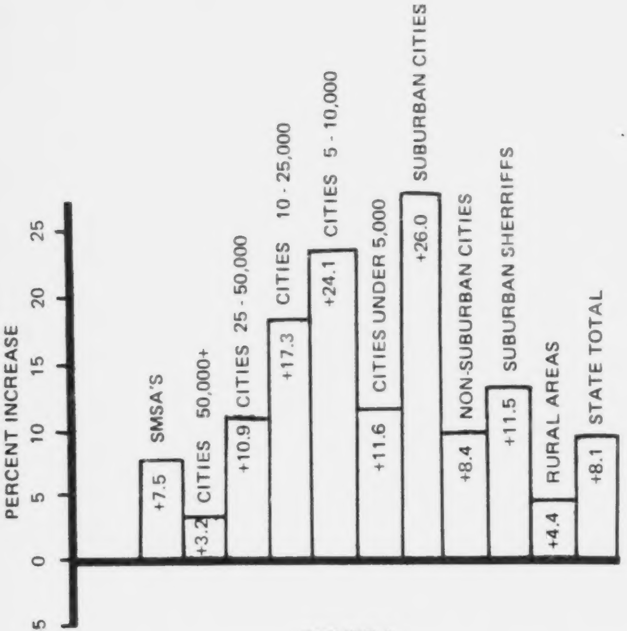

FIGURE 4

Figure 4 portrays percentage changes in the total crime rate between 1978 and 1979, by population category.

If we examine rates of violent crime shown in Table II, the relationship between the violent crime rate and population is similar to that for the total crime rate. The highes rate of violent crime in 1979 is found in the state's largest cities, with populations of 50,000 and more. This repeats the pattern found for the total crime rate, but the distinctiveness of large cities with regard to violent crime is more pronounced than for the total crime rate. Cities of

50,000 population and over experienced a rate of violent crime in 1978 more than twice as high as the state average.

Rural areas are distinctive in their low violent crime rate. The violent crime rate for rural areas is approximately one-sixth of the statewide average.

The following population groupings experienced declines in their violent crime rates between 1978 and 1979: all cities of under 5,000 population, suburban cities of under 5,000 people, and non-suburban cities of under 5,000 population and universities. All other groupings had increases.

The sharpest percentage increase in the violent crime rate was in suburban cities of 25,000 to 50,000 people, with a rise of 58.2%. Non-suburban cities of 5,000 to 10,000 people experienced a 53.0% rise in their violent crime rate, while all cities of 5,000 to 10,000 people taken together showed a 51.1% increase.

Looking at rates for each of the four types of violent crime, the patterns indicated in Table II are generally similar to those for total and violent crime rates. Cities of 50,000 and over had the highest rate in the state during 1979 for murder, rape, and robbery. However, suburban cities of 10,000 to 25,000 population had the highest rate of aggravated assault in 1979.

There were several cases of extreme fluctuation in rates of murder and rape between 1978 and 1979. As noted in previous reports, conclusions based on these changes are likely to be misleading, because of the infrequency with which these crimes occur.

The robbery rate increased 7.0% statewide between 1978 and 1979. The greatest percentage increases were in suburban cities of 5,000 to 10,000 people (93.6%) and suburban cities of 10,000 to 25,000 population (79.5%). However, the relatively low frequencies of robberies in these areas renders these changes of questionable significance. Contrary to the general statewide increase in the robbery rate during 1979, some population categories experienced declines. The largest percentage decrease was in non-suburban cities of under 5,000 people (64.2%). Also notable were declines in the robbery rate for universities (54.6%) and in all cities of under 5,000 people (37.7%).

A statewide increase of 16.1% in the rate of aggravated assaults was accompanied by corresponding increases for most population groupings. The exceptions were in the categories of cities under 5,000 population. Overall, these cities had a 12.4% decline in their aggravated assault rate; suburban cities of under 5,000 population showed a 24.7% decrease, and non-suburban cities in this population category experienced a 5.8% decline in the rate of reported assaults.

Because property crime made up nearly 96% of all Part I crime in Iowa during 1979, patterns of property crime shown in Table II are essentially parallel to those for the total crime rate. Again, cities over 50,000 had the highest rate of total property crime. This also holds for each of three individual property crimes: burglary, larceny, and motor vehicle theft.

The statewide burglary rate rose 5.8% in 1979. Suburban cities showed the most substantial percentage increases; the burglary rate increased 32.1% in suburban cities as a whole. Conversely, the burglary rate declined by 7.2% in non-suburban cities of 25,000 to 50,000 people, and by 0.9% in rural areas.

There was a 7.9% increase in the statewide larceny rate between 1978 and 1979. Larceny rates increased most dramatically in suburban cities. For example, the larceny rate in the largest suburban cities (25,000 to 50,000 population) rose 29.0% between 1978 and 1979. In suburban cities of 5,000 to 10,000 people, the larceny rate increased 33.1%.

The rate of motor vehicle thefts in Iowa increased by 14.9% in 1979, with most population groupings paralleling this statewide trend. The motor vehicle theft rate increased by 29.6% in suburban cities, and by 14.5% in non-suburban cities. The state's largest cities experienced a 12.2% rise.

Figures 5 through 8 depict the distribution of reported index offenses statewide, in SMSAs, non-suburban cities, and rural areas in 1979. Larceny accounted for 68.1% of the reported index crime statewide, followed by burglary at 21.4%. This pattern of larceny and burglary making up about 90% of the reported index offenses holds true for SMSAs, non-suburban cities, and rural areas, although the relative proportions of the two offenses varied somewhat between population groups.

Violent crime accounted for less than 5% of Iowa's Part I crime in 1978. This finding also held for non-suburban cities and rural areas. In the SMSAs, violent crime was 5.4% of the total.

DISTRIBUTION OF IOWA PART I CRIME, BY AREA, 1979

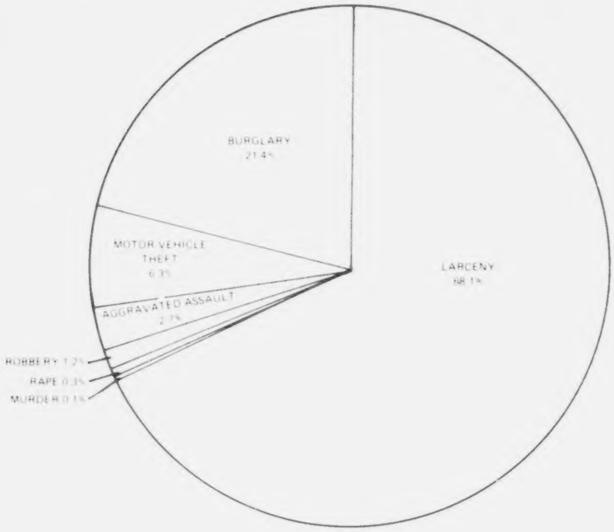

FIGURE 5

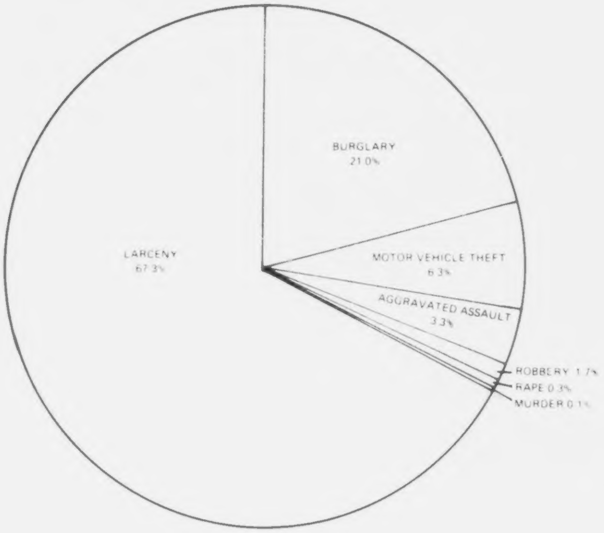

FIGURE 6

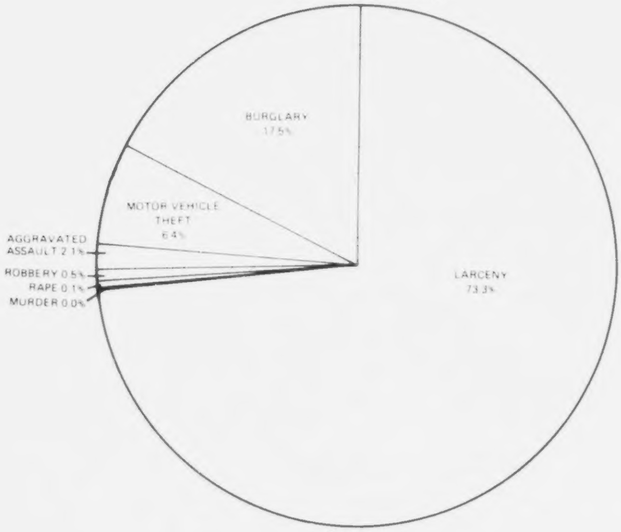

FIGURE 7

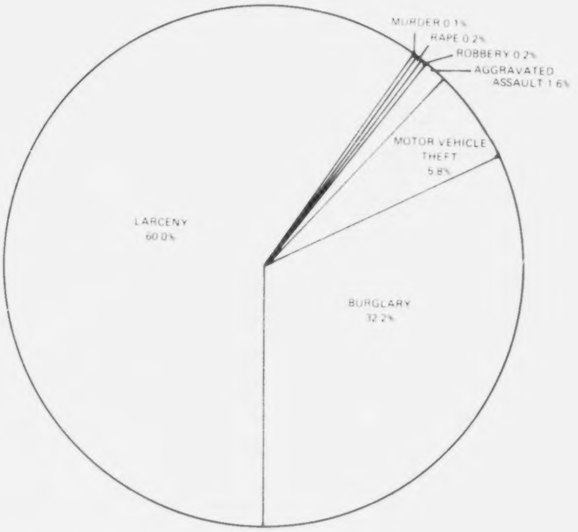

FIGURE 8

C. Monthly Offense Pattern and Offense Characteristics

1. Crime Index Totals

Figure 9 presents the monthly trend of total index offenses during and 1979, and indicates that the increase in crime in 1979 was reflected during each month of the year. The patterns were similar during the two years. In both years, the summer and early fall months experienced the greatest volume of reported crime. This seasonal pattern is frequently reflected in reported crime data.

The increase in reported violent index crime, as shown in Figure 10, experienced by Iowa in 1979 is reflected in figures for all except two months. In July and December, 1979, there were fewer violent index offenses reported than in the same months in 1978. However, all other months in 1979 showed more reported violent crimes than occurred during the corresponding months of the prior year.

The monthly pattern of reported property offenses, which is shown in Figure 11, closely parallels the trend for all Part I crime, because of the predominance of property crime in the total crime index.

2. Characteristics and Dollar Value of Property Stolen

Figure 12 summarizes the type and value of property stolen in Iowa during 1979. There was $44,833,419 worth of property reported stolen during 1979, which is an increase of 23.4% from the 1978 total of $36,325,504. Stolen property recovered during 1979 was valued at $16,594,267, an increase of 19.3% over 1978. In dollar terms, the percentage of stolen property recovered declined from 38.3% in 1978 to 37.0% in 1979.

As was true during the past three years, the category with the greatest dollar loss in 1979 was locally stolen motor vehicles. The value of these

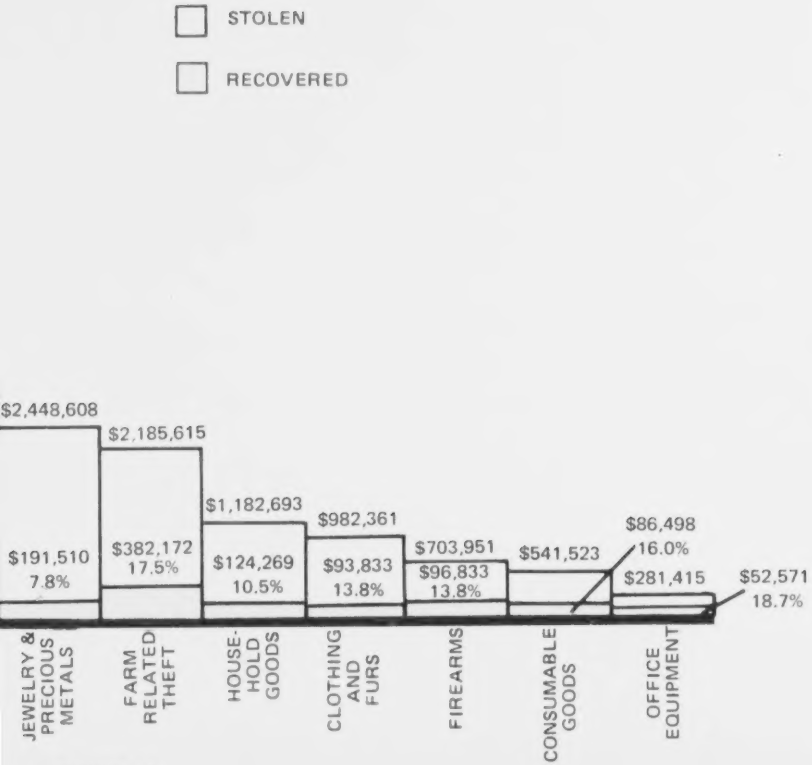

FIGURE 12

DOLLAR VALUE OF PROPERTY STOLEN
1979

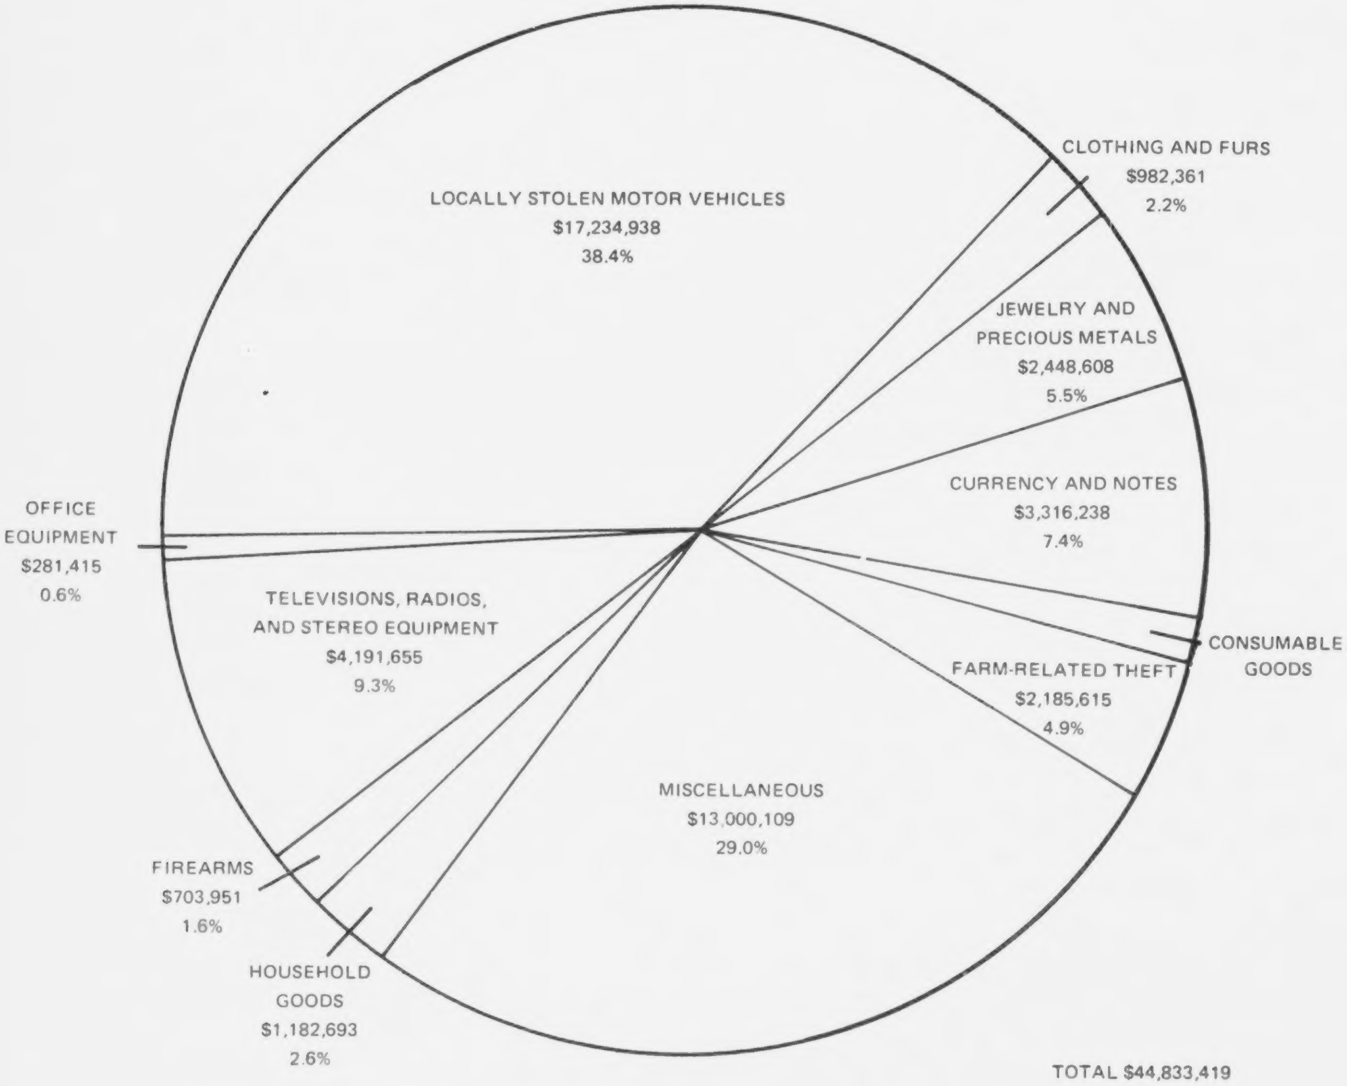

FIGURE 13

was $17,234,938, with $13,227,913, or 76.8% being returned. Locally stolen motor vehicles accounted for 38.4% of the value of property stolen in 1979, and 79.7% of the value of property recovered. Figure 13 further illustrates the distribution of losses from theft during 1979.

3. Farm-Related Theft

It is noteworthy, in view of Iowa's agricultural tradition, that the category "farm-related theft" shown in Figure 13, accounts for only 4.9% of the total estimated property loss from theft suffered by Iowans during 1979. More detail on the nature and location of farm-related theft is shown in Figures 14 and 15. Although farm-related theft represents a relatively small portion of the total dollar loss from theft suffered by Iowans during 1979, the critical position of agriculture in Iowa's economy enhances the significance of this information.

As shown in Figure 14, nearly one-third of the dollar loss resulting from farm-related theft is accounted for by thefts of farm machinery. The estimated value of farm machinery reported stolen to Iowa law enforcement agencies during 1979 was $692,458, or 31.7% of the total estimated property loss from reported farm-related theft.

Thefts of livestock amounted to $954,568 of dollar loss during 1979. This was 43.7% of the total loss from farm-related theft. Cattle thefts accounted for $497,848 of estimated property loss, which is 52.2% of the dollar loss from livestock theft and 22.8% of the total dollar loss from farm-related theft.

Figure 15 shows the dollar loss suffered from farm-related theft by the type of area in which it occurred. It illustrates that farm-related theft is predominantly, but not exclusively, a rural problem. Of the $2,185,615 in dollar losses from farm-related theft reported in 1979, $1,803,007, or 82.5% occurred in the state's rural areas. The remainder is nearly evenly split between the state's cities (8.6%) and suburban sheriffs jurisdictions(8.8%).

FARM-RELATED THEFT: DOLLAR VALUE OF PROPERTY STOLEN

1979

DOLLAR VALUE OF FARM-RELATED THEFT, BY POPULATION AREA, 1979

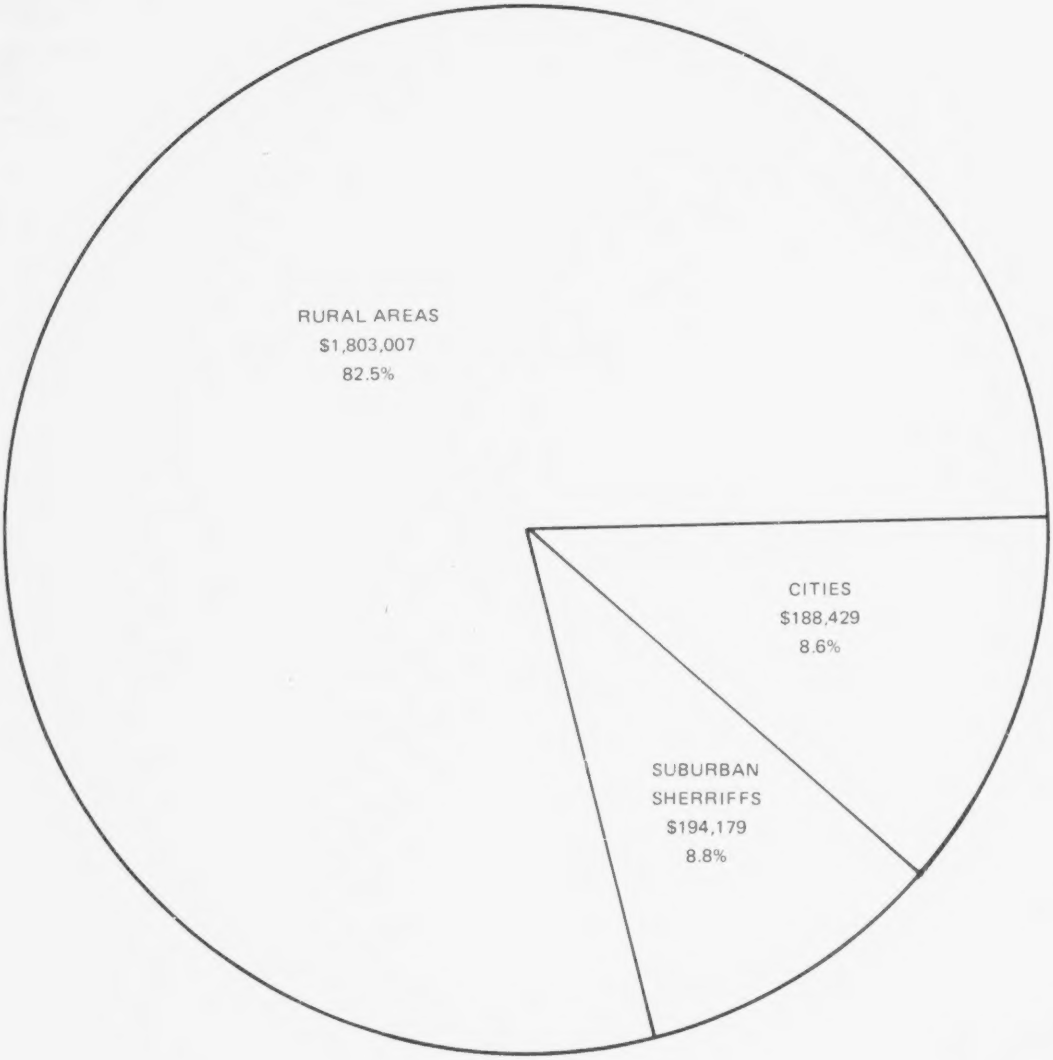

FIGURE 15

1. Murder

There were 65 murders reported to Iowa law enforcement agencies during 1979, a decrease of 9.7% from the 72 murders reported during 1978. Figure 16 shows the monthly trend of reported murders in the two years.

MURDER
1978 & 1979
BY MONTH

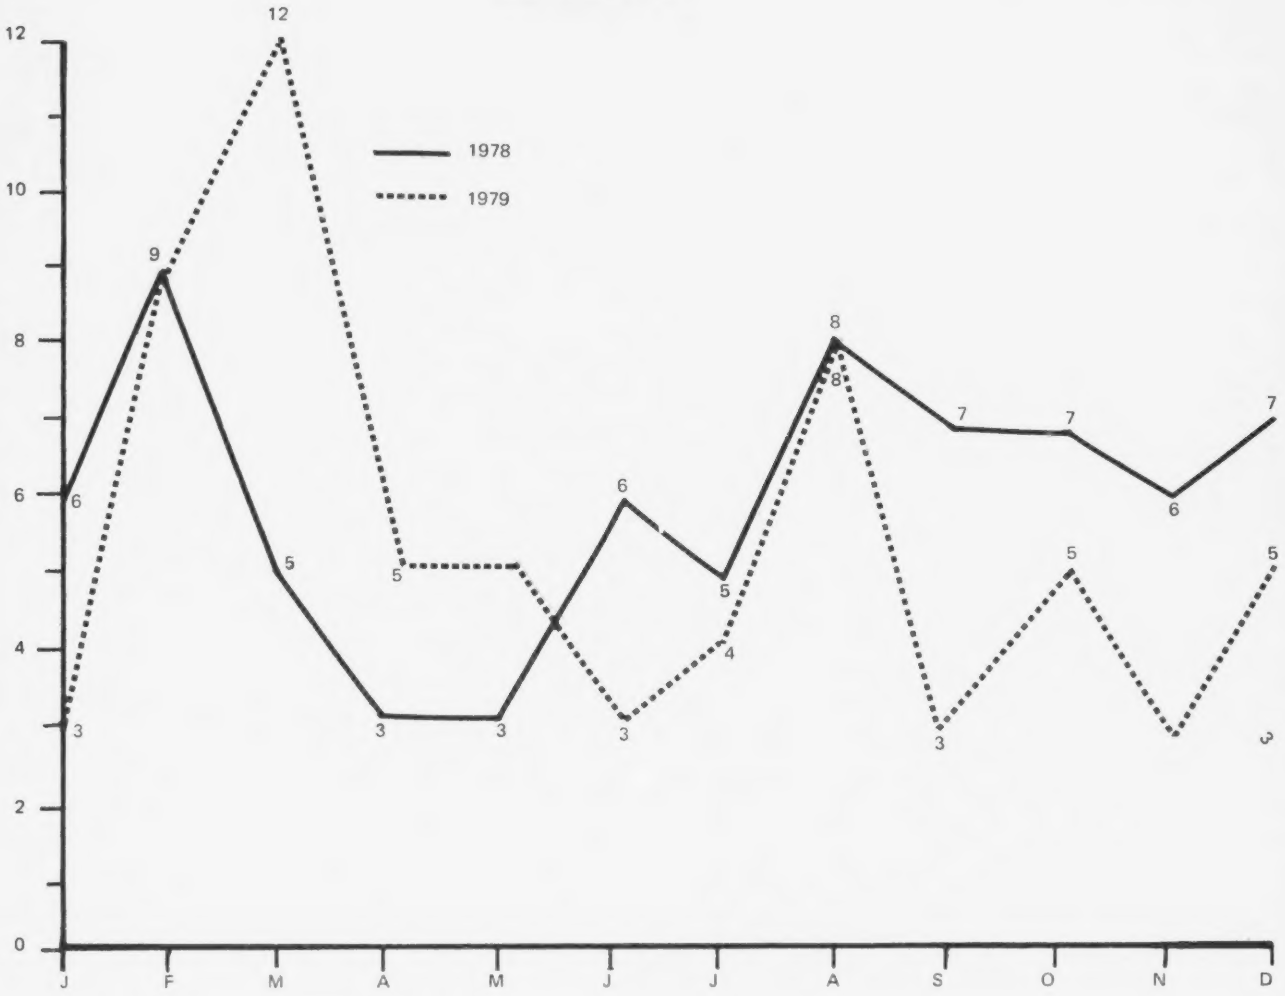

FIGURE 16

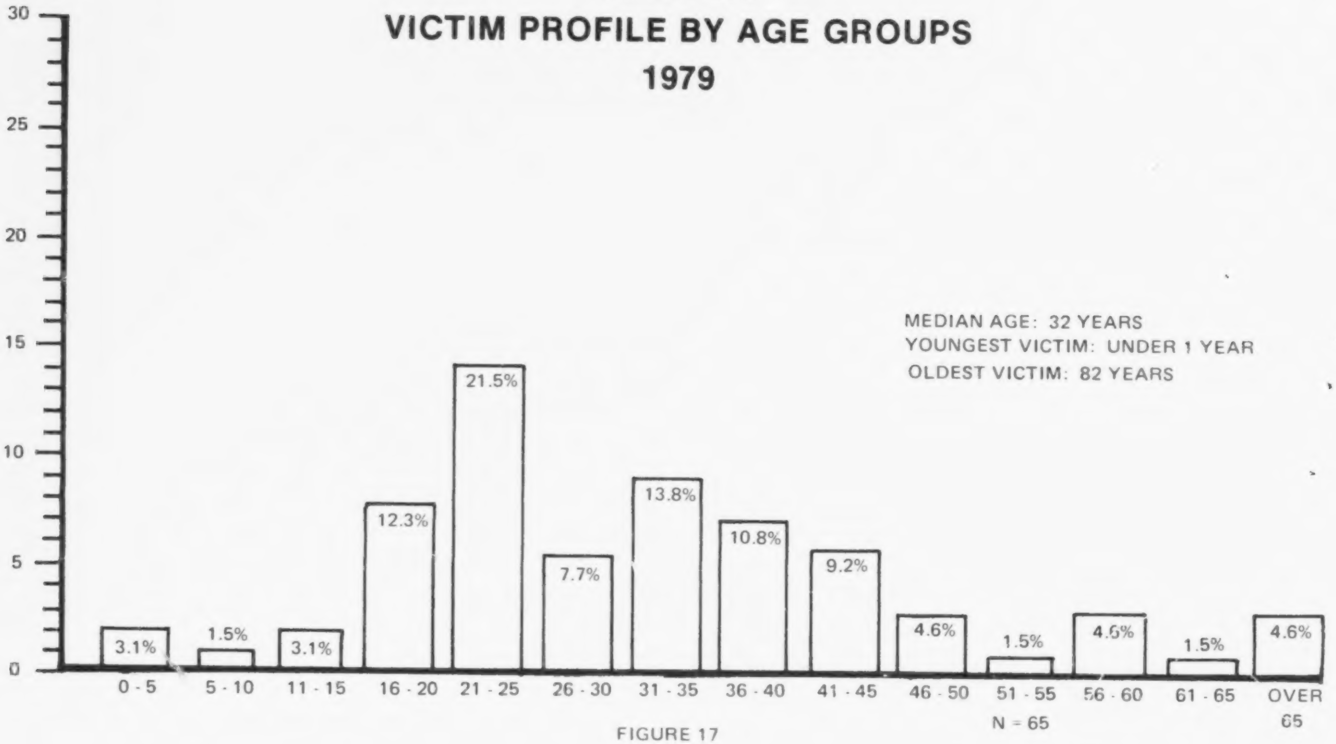
Both trend lines show substantial monthly fluctuations, and as has been noted in previous annual reports, Iowa's murder rate is generally too low to establish identifiable trends.

Figures 17, 18, and 19 graphically profile characteristics of the state's 65 murder victims. An age profile of the 1979 murder victims is given in Figure 17. Victims ranged in age from under one year to 82 years. The

MURDER:
VICTIM PROFILE BY AGE GROUPS
1979



MEDIAN AGE: 32 YEARS
YOUNGEST VICTIM: UNDER 1 YEAR
OLDEST VICTIM: 82 YEARS

N = 65

FIGURE 17

MURDER: VICTIM PROFILE BY SEX, 1979

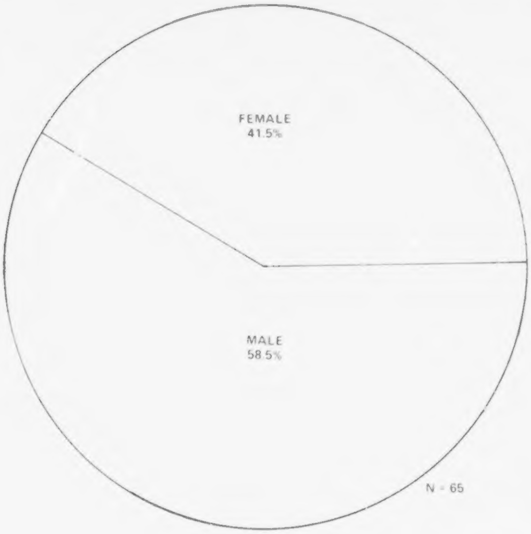


FIGURE 18

MURDER: VICTIM PROFILE BY RACE, 1979

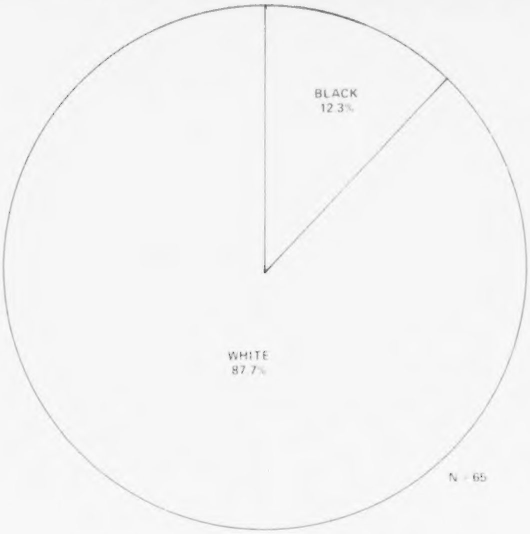

FIGURE 19

median age was 32 years. This age breakdown is similar in several aspects to that for 1978 murder victims. The median victim age was identical in both years, as was the age of the oldest murder victim in both years. In both cases, the youngest victim had not yet reached his/her first birthday.

Figure 18 indicates that 58.5% of the victims were male and 41.5% were female. This is a rise in the percentage of female victims from 1978, when 26.4% of the victims were female. Figure 19 shows that 87.7% of the murder victims were white, while 12.3% were black. During 1978, 83.3% of the victims were white.

Profiles of the 49 known offenders are displayed in Figures 20, 21 and 22.

Figure 20 depicts the age profile of known murderers. Nearly one-half of the offenders were between 21 and 30 years old, with the median age being 30 years. The youngest offender was 14, while the oldest was 70.

Figure 21 is a breakdown of known murder offenders by sex: 75.5% were male and 24.5% were female. According to the data shown in Figure 22, 91.8% of the known offenders were white, while the remaining 8.2% were black.

MURDER: OFFENDER PROFILE BY AGE GROUPS, 1979

MURDER: OFFENDER PROFILE BY RACE, 1979

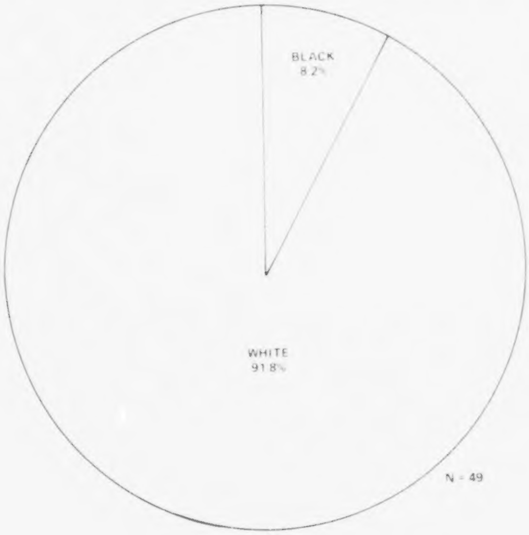

FIGURE 22

MURDER: RELATIONSHIP OF VICTIM TO OFFENDER, 1979

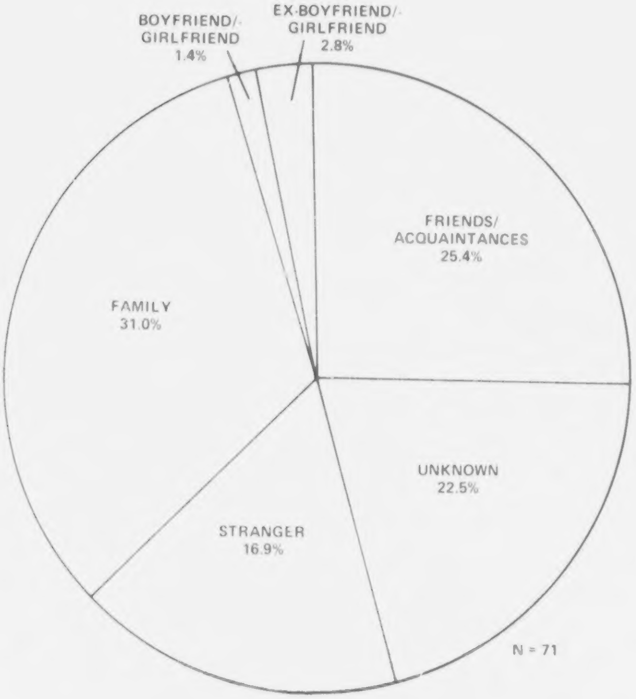

FIGURE 23

MURDER SITUATIONS, 1979

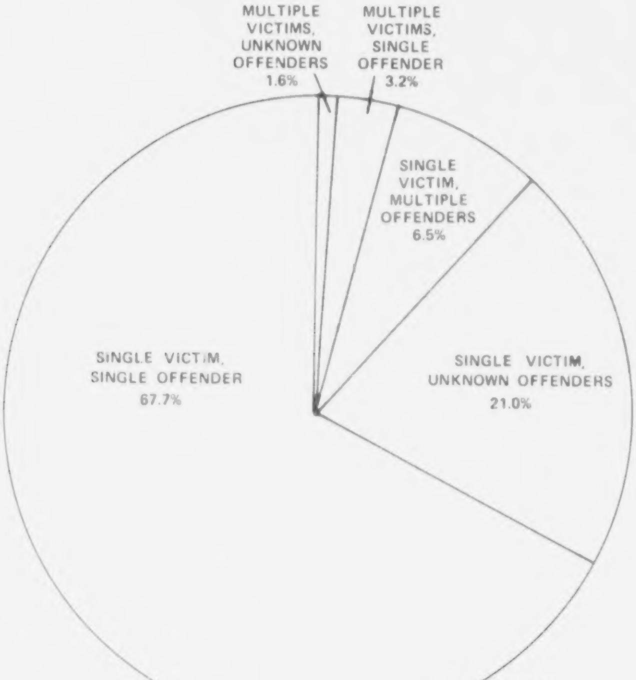

FIGURE 24

AREAS IN WHICH MURDERS DISCOVERED, 1979

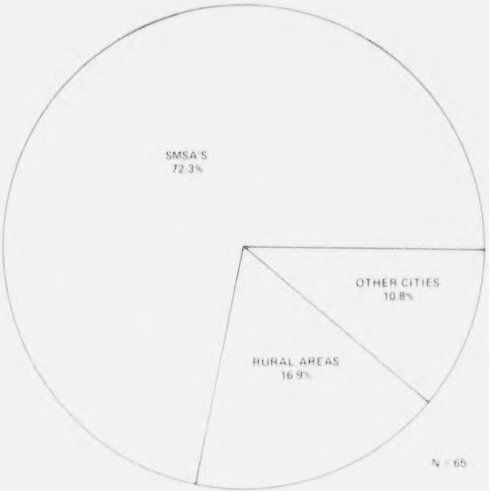

FIGURE 25

Relationships of victims to offenders are shown in Figure 23. Family relationships were most frequent (31.0%). Next most frequent were victims who were friends or acquaintances of their murderers (25.4%). Of the 71 known victim-offender relationships, 16.9% were between strangers. Nearly one-quarter (22.5%) of the relationships between victims and their murderers were unknown.

Murder situations are summarized in Figure 24. There were 62 murder incidents recorded during 1979: 59 involving one murder victim, three involving two victims for a total of 65 victims. A majority (67.7%) of the 62 incidents involved a single victim and single offender, while only 4.8% involved multiple victims. Four incidents (6.5%) are known to have involved multiple offenders.

Figure 25 summarizes the areas in which murders were discovered in Iowa in 1979. Over two-thirds (72.3%) of the 65 murders occurred in the state's Standard Metropolitan Statistical Areas (SMSAs). This is comparable to 1977, when 70.1% of the murders were in SMSAs, and to 1978, when 68.1% of Iowa's murders occurred in metropolitan areas.

Figure 26 summarizes data on weapons used in the 65 murders during 1979. Handguns were the most commonly used weapon, accounting for 32.3% of the murders. The comparable percentage for 1978 was 43.1%. Taken together, firearms were used in 61.5% of the 1979 murders, compared with 56.9% of the 1978 murders.

Circumstances surrounding murders during 1979 are shown in Figure 27. A majority (53.8%) of the murders occurred in connection with arguments or disputes, including love triangles and barroom brawls.

MURDER: TYPE OF WEAPON USED, 1979

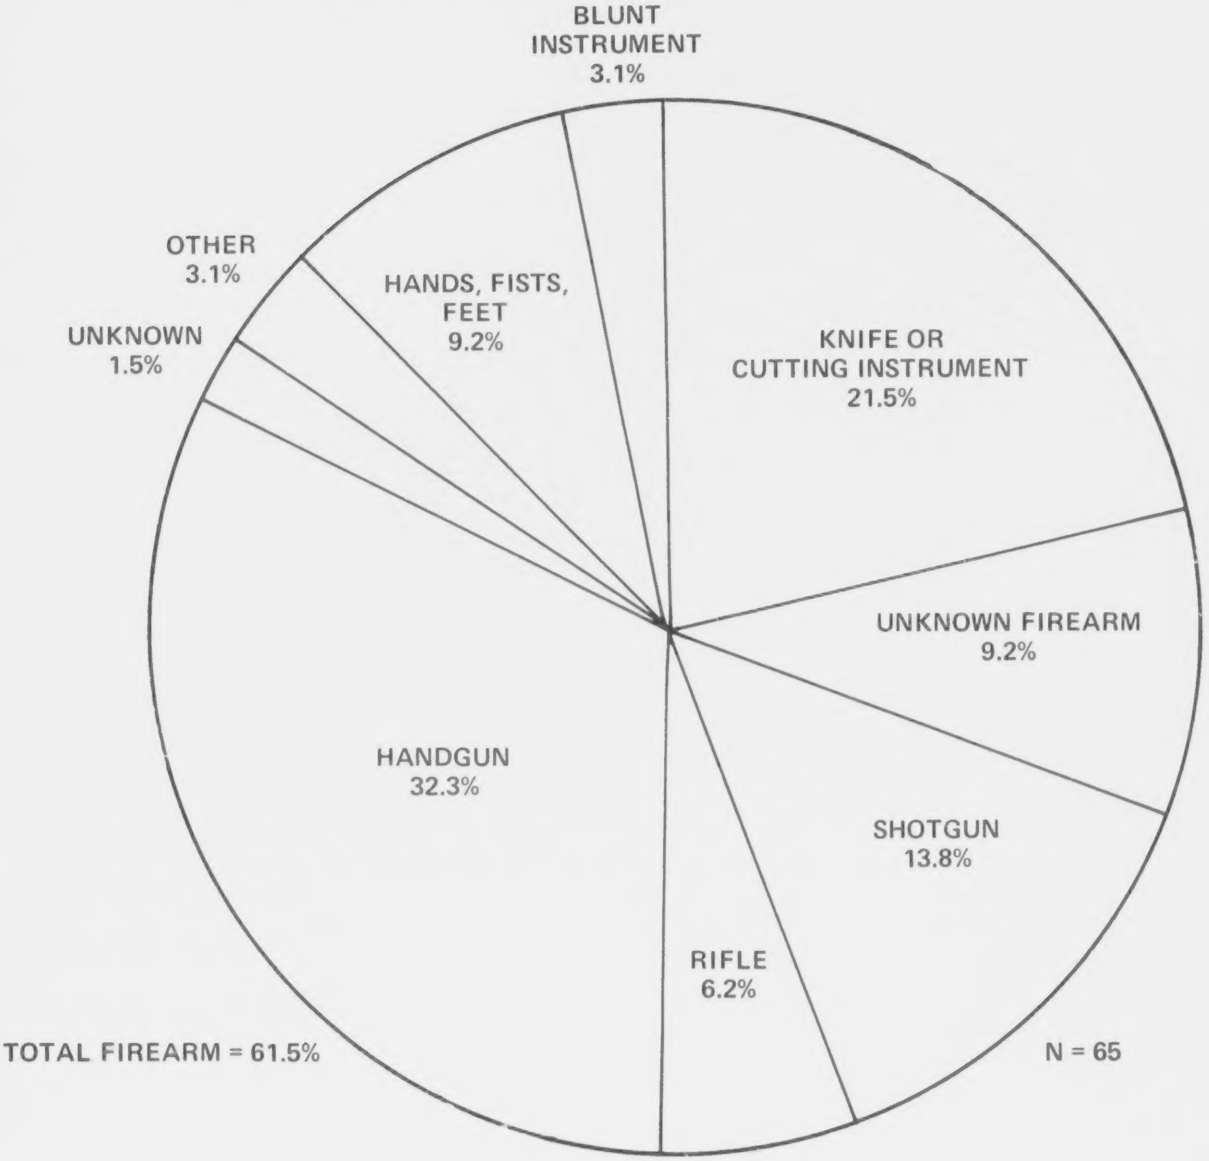

FIGURE 26

MURDER CIRCUMSTANCES, 1979

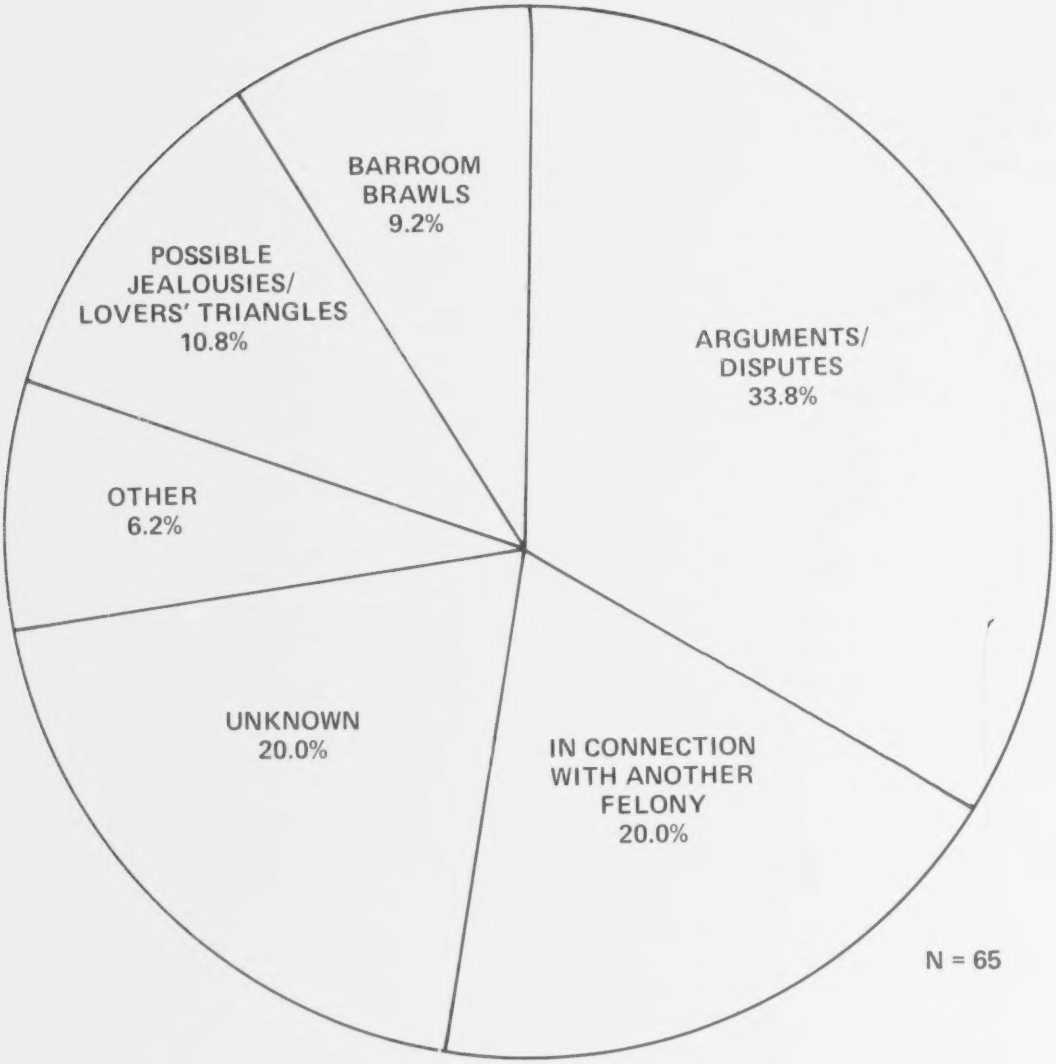

FIGURE 27

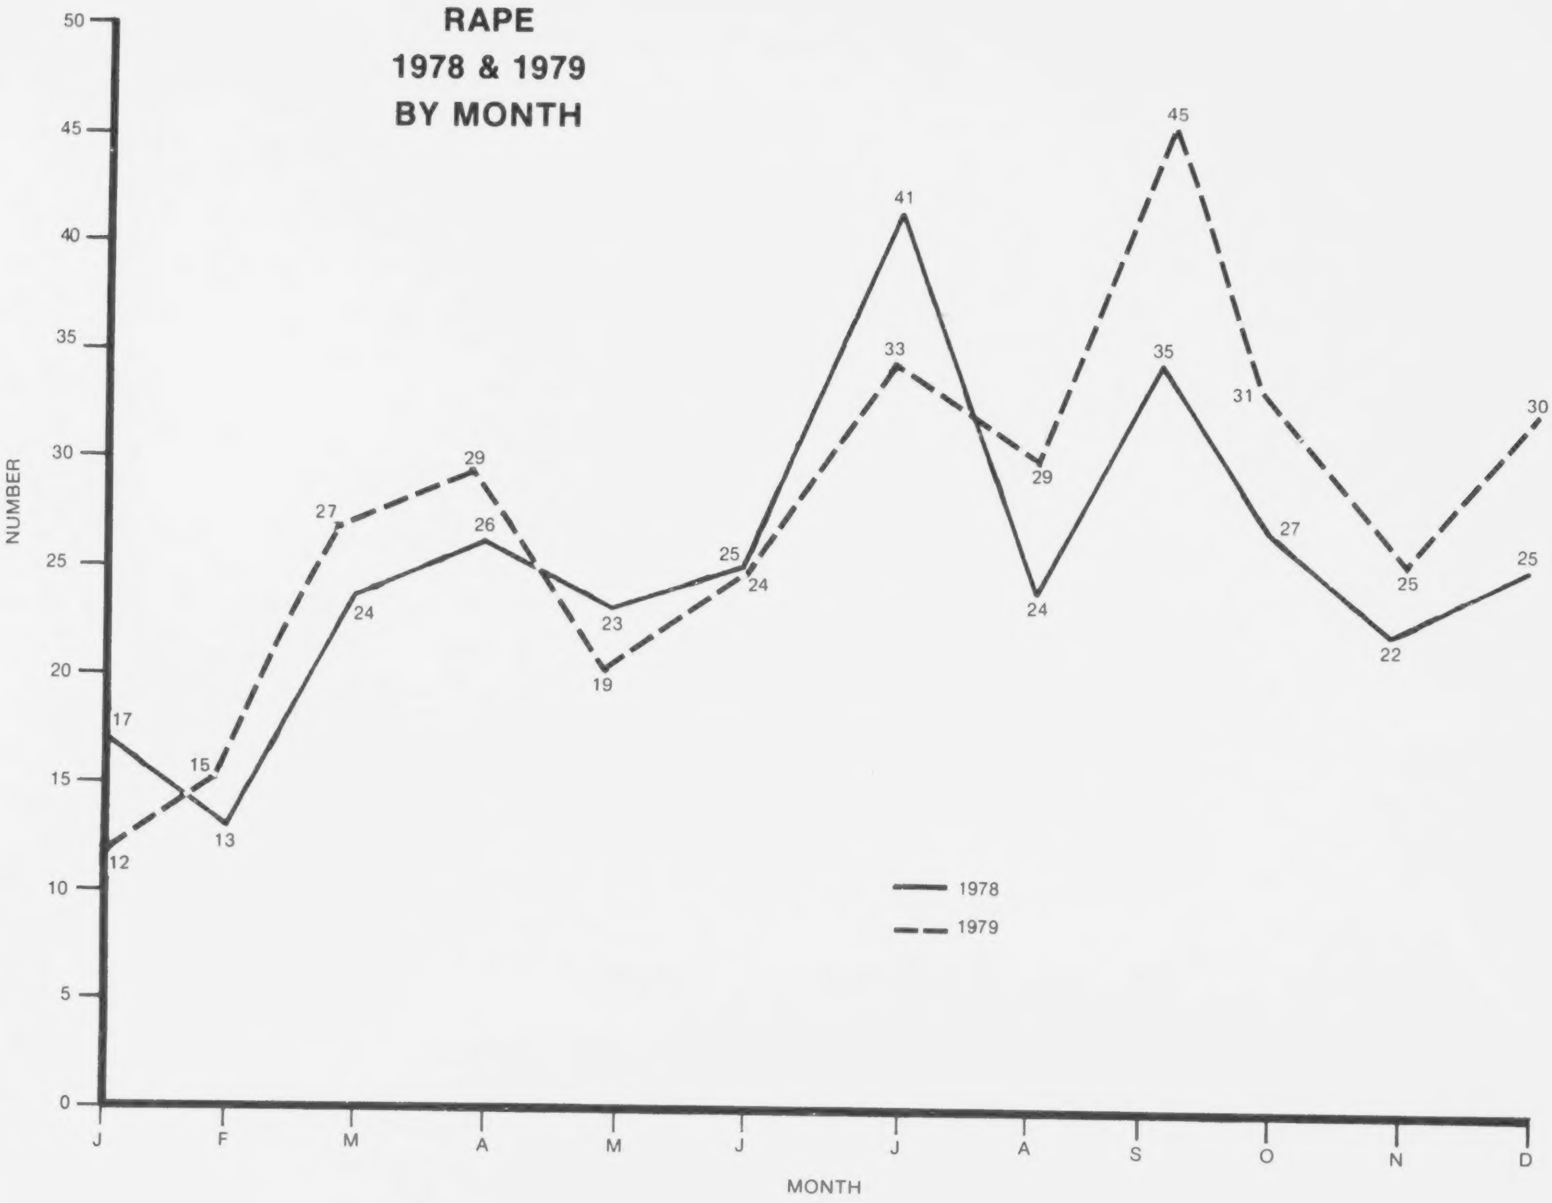
5. Rape

The monthly pattern for rape appears in Figure 28. The patterns for 1978 and 1979 are similar, although the peak month was July in 1978 and September in 1979. These trends are generally consistent with ones found in earlier years.



RAPE
1978 & 1979
BY MONTH

FIGURE 28

6. Robbery

Robbery trends are shown in Figure 29. Robbery trends are unusual in comparison with those for other offenses in that they often peak in the cold weather months of January and December. Indeed, the peak month for reported robberies in 1978 was December. However, the robbery trend for 1979 peaked in October. There were more reported robberies during most of the months of 1979 than during the corresponding months of 1978. However, there were exceptions. Most notable is the month of December, in which there were 31 percent fewer robberies in 1979 than there had been one year earlier.

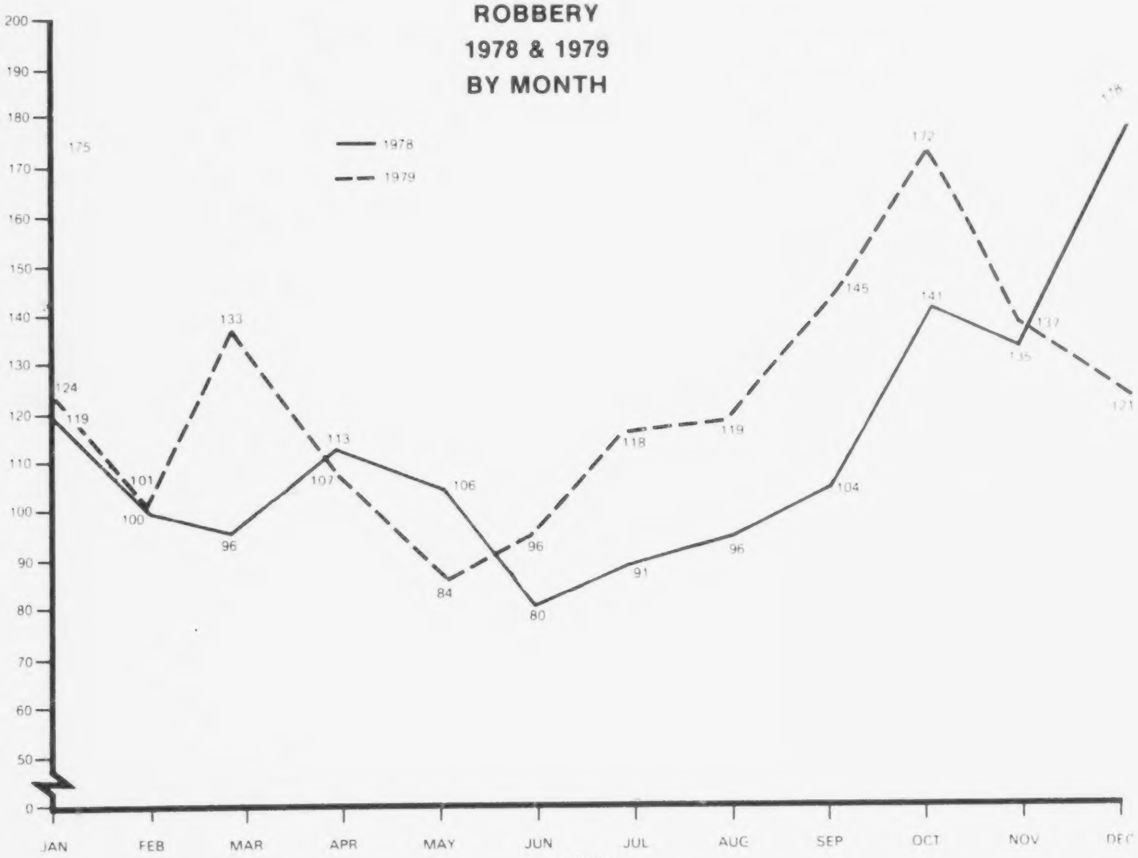


FIGURE 29

An illustration of the monthly distribution of weapons used in robberies is presented in Figure 30, which shows that during the winter months a higher proportion of robberies involve use of firearms. During the summer months the numbers of strong-arm and firearm-related robberies were similar: in cold weather months the number of robberies involving firearms was much higher. This repeats the pattern found in both 1977 and 1978.

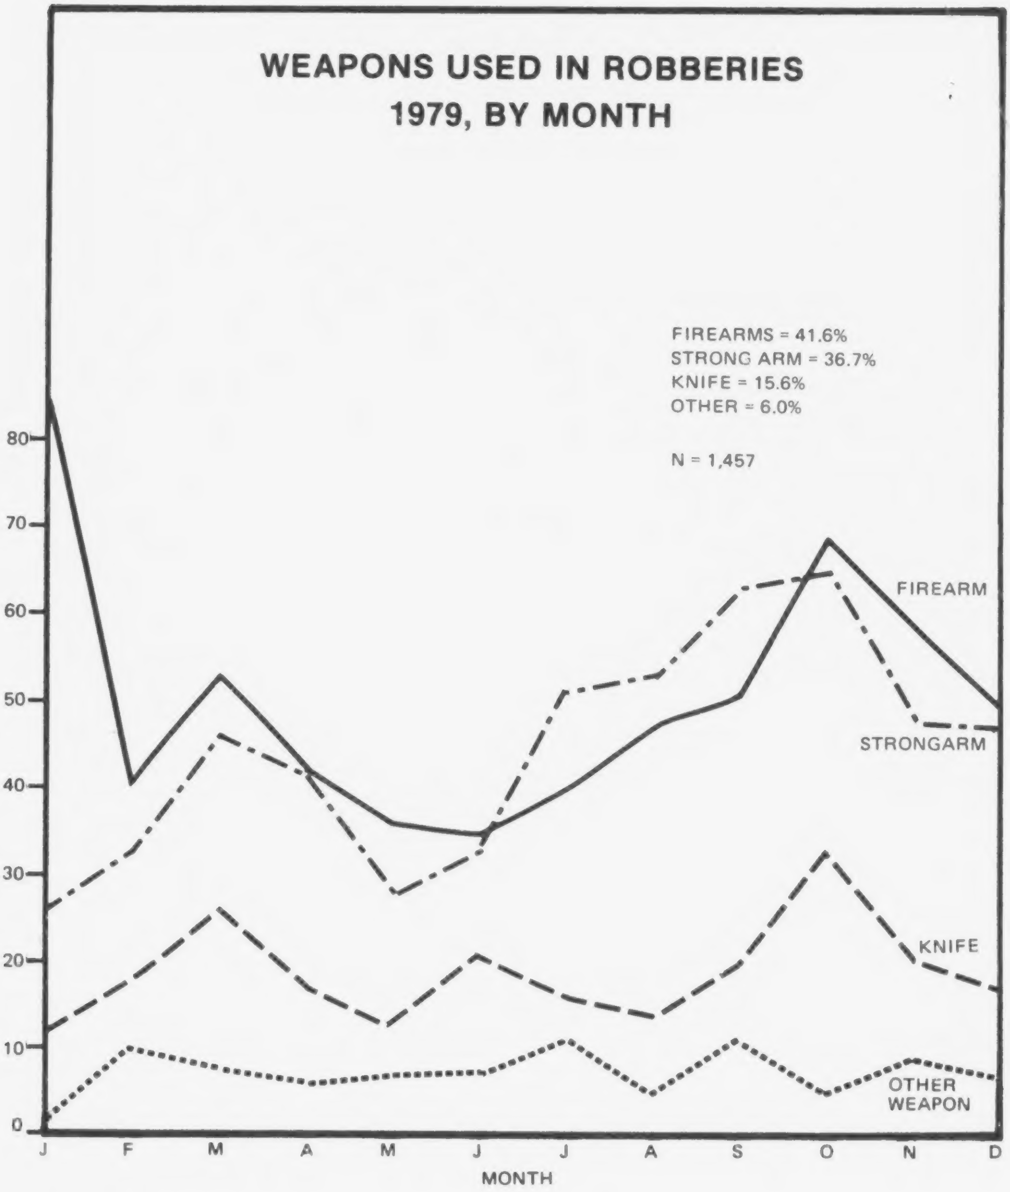

FIGURE 30

Figure 31 portrays the distribution of robberies in 1979. Highway robberies were most common, repeating the patterns found in each of the past three years. Robberies from commercial houses (businesses) were next in frequency, followed in order by convenience store robberies, residential robberies, and gas or service station robberies. Bank robberies accounted for only 1.1% of the total robberies reported in Iowa during 1979.

DISTRIBUTION OF ROBBERY, 1979

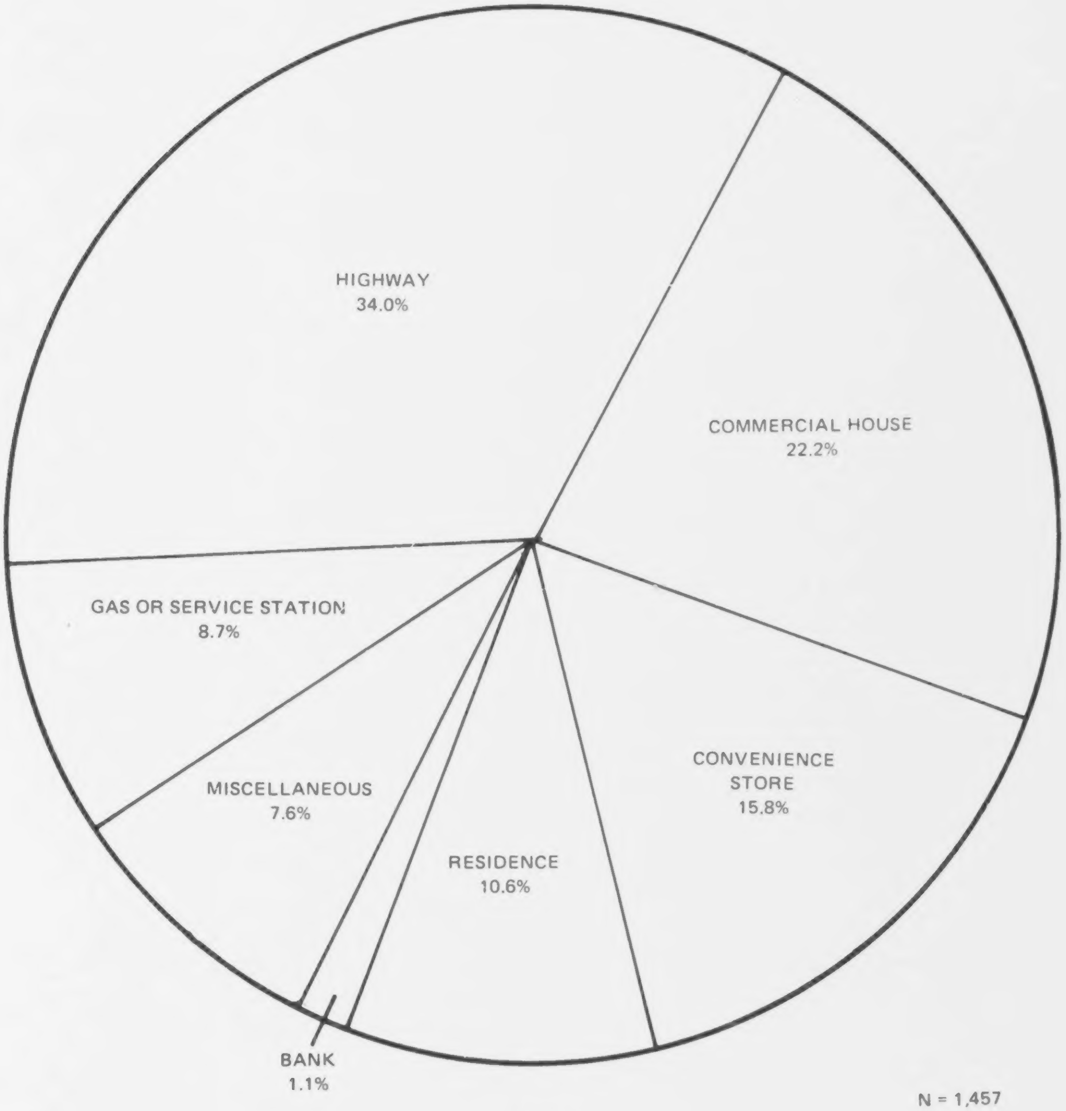

FIGURE 31

Dollar losses from robberies reported during 1979 are shown in Figure 32. Noteworthy in this figure is the prevalence of robberies from commercial houses which accounted for 68.3% of the dollar loss from robberies during 1979, up from 14.6% of the 1978 robbery dollar loss. Total dollar losses from robbery increased 49.4% between 1978 and 1979.

DOLLAR LOSS FROM ROBBERY
1979

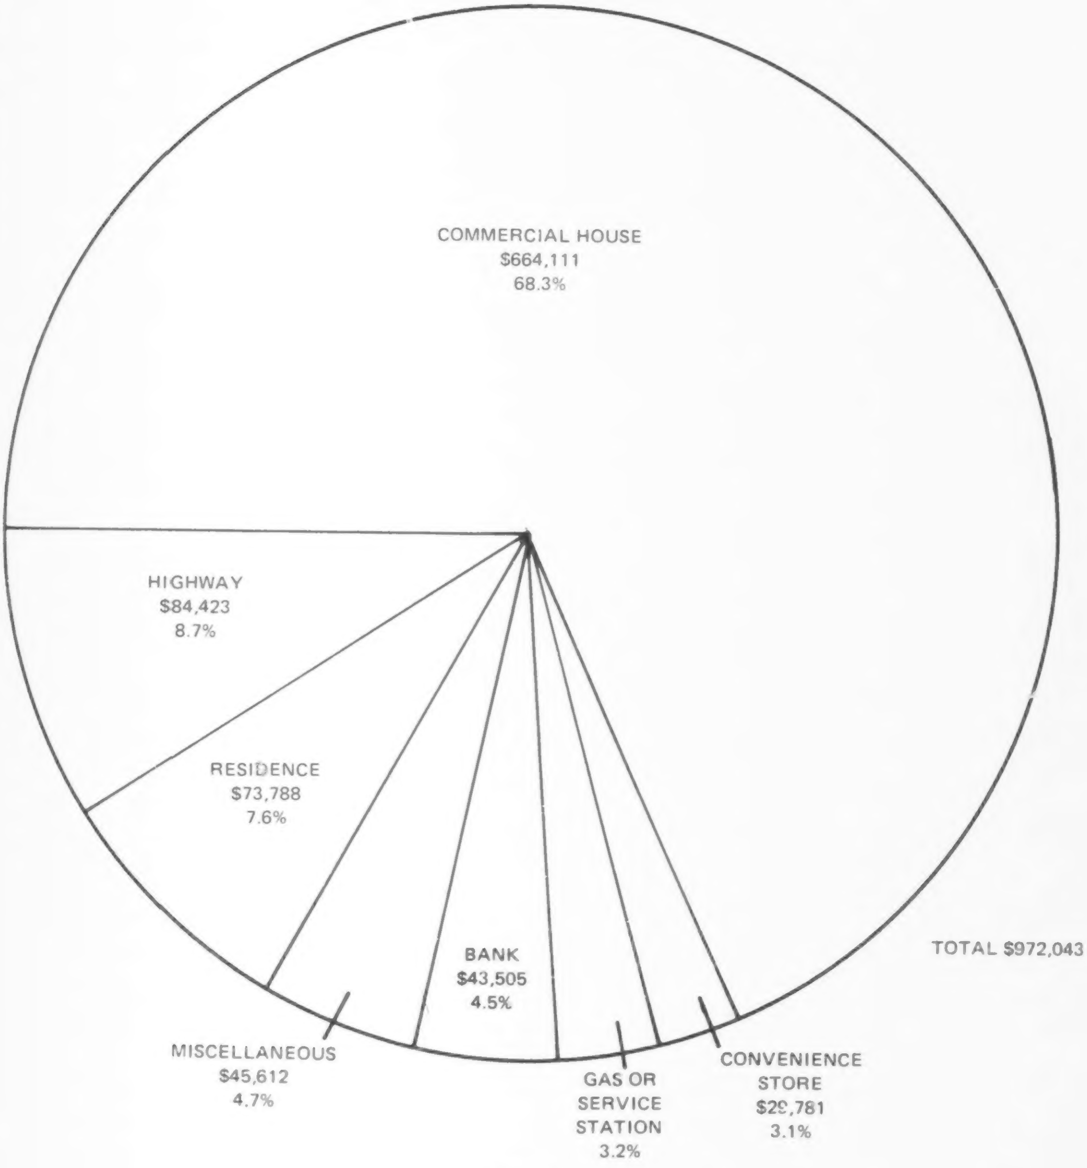

FIGURE 32

Table III breaks down the increase in dollar loss from robbery between 1978 and 1979 by robbery type. Dollar losses from commercial house robberies showed the largest increase of 600.9%. The reasons for this increase are not apparent. Dollar loss from highway robberies rose 39.3%. Conversely, dollar losses from miscellaneous robberies declined 83.2% and losses from bank robberies by 53.2%.

TABLE III

PERCENT CHANGE IN DOLLAR VALUE OF ROBBERY
1978-1979, BY TYPE

Miscellaneous	270,769	45,612	-83.2	2,975	411	-86.2
Total	650,537	972,043	+49.4	479	667	+39.2

(N/A - not available)

Table III also presents data on average dollar loss by type of robbery for 1978 and 1979. The average dollar loss from commercial house robberies rose by 423.2%. Other categories showing increases in average dollar loss were gas station robberies (49.1%), residential robberies (35.2%), and highway robberies (22.1%). The average dollar loss from miscellaneous robberies dropped 86.2% and that from bank robberies declined 47.3%.

7. Assault

Figure 33 depicts the monthly pattern of aggravated assaults during 1978 and 1979. Assaults peaked in the warmest months during 1978. However,

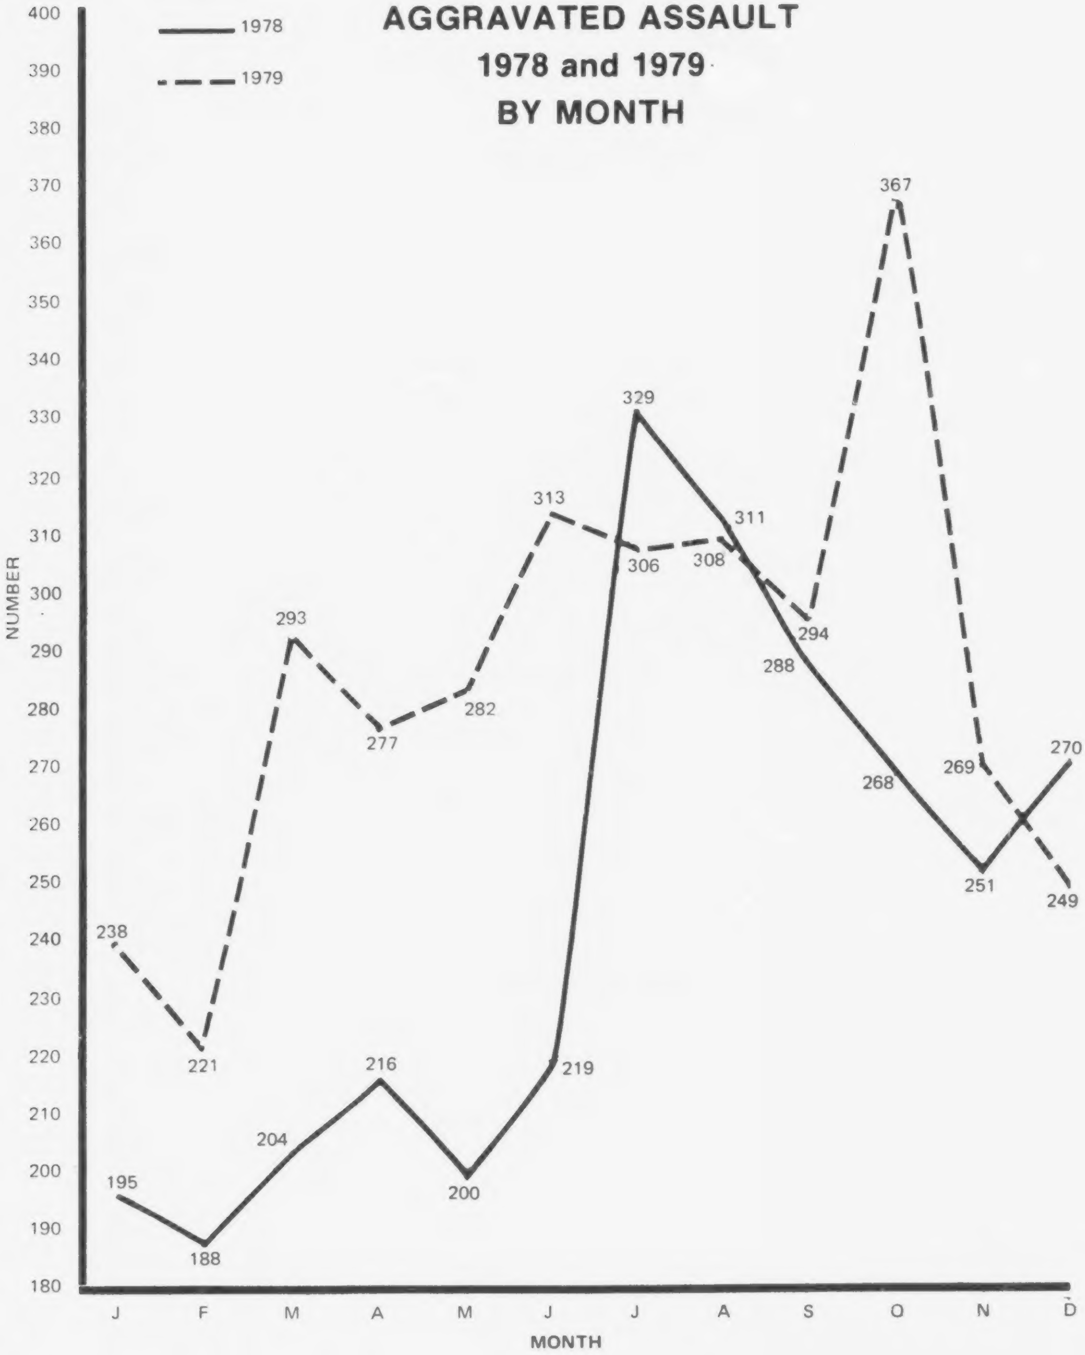

FIGURE 33

in 1979, there were more assaults reported in October than in any other month. Weapons used in aggravated assault are shown in Figure 34. Personal weapons (hands, fists, feet, and other parts of the body) are the most frequently used, accounting for 51.9% of the 1979 assaults. The 1979 pattern is similar to those occurring in prior years.

WEAPONS USED IN AGGRAVATED ASSAULT, 1979

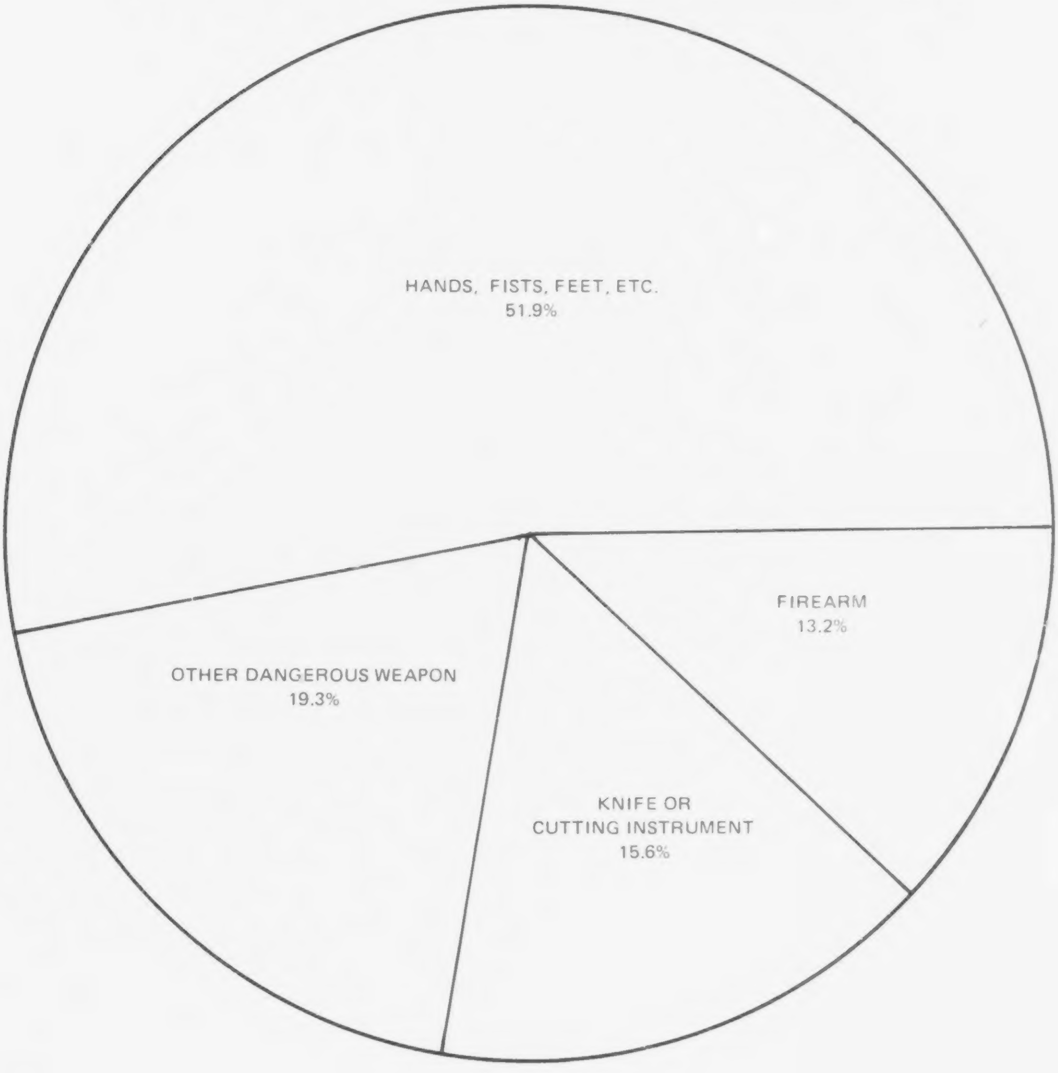

FIGURE 34

8. Burglary

Monthly burglary offense trends for 1978 and 1979 are shown in Figure 35. Contrary to previous years' patterns, burglaries in 1979 peaking in the later months of the year, with the largest monthly total occurring in December.

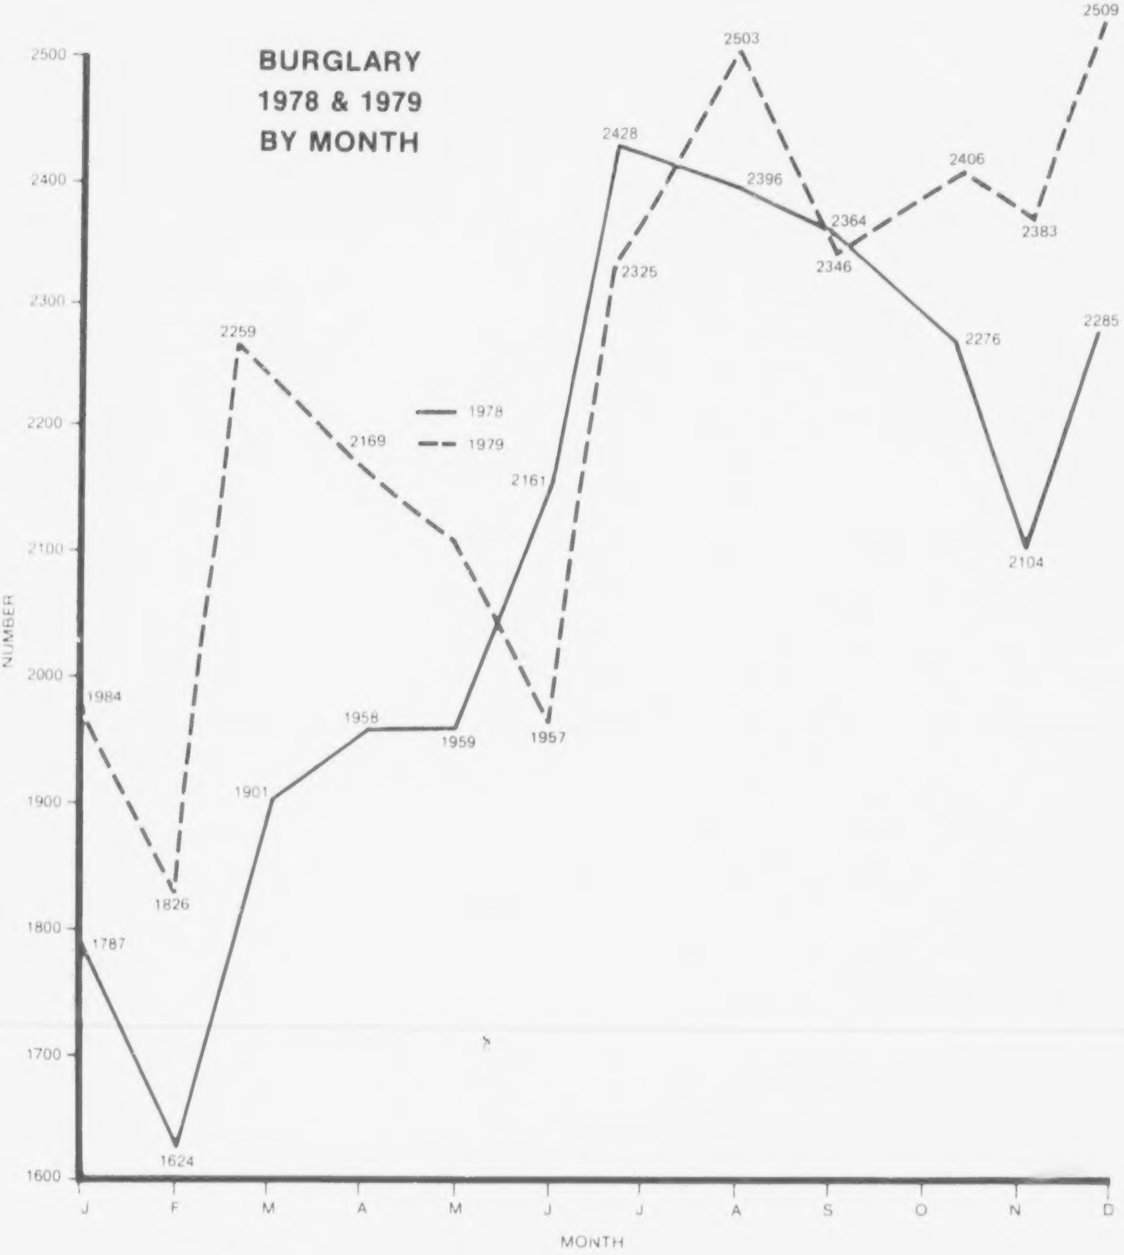

FIGURE 35

Figure 36 presents a distribution of 1979 burglaries. During 1979, 59.4% of the reported burglaries were residential, down slightly from 59.9% of the 1978 burglaries. Burglary in the night time was most common for both residences and non-residences, repeating patterns found in early years. Non-residential day time burglaries are especially infrequent.

DISTRIBUTION OF BURGLARY, 1979

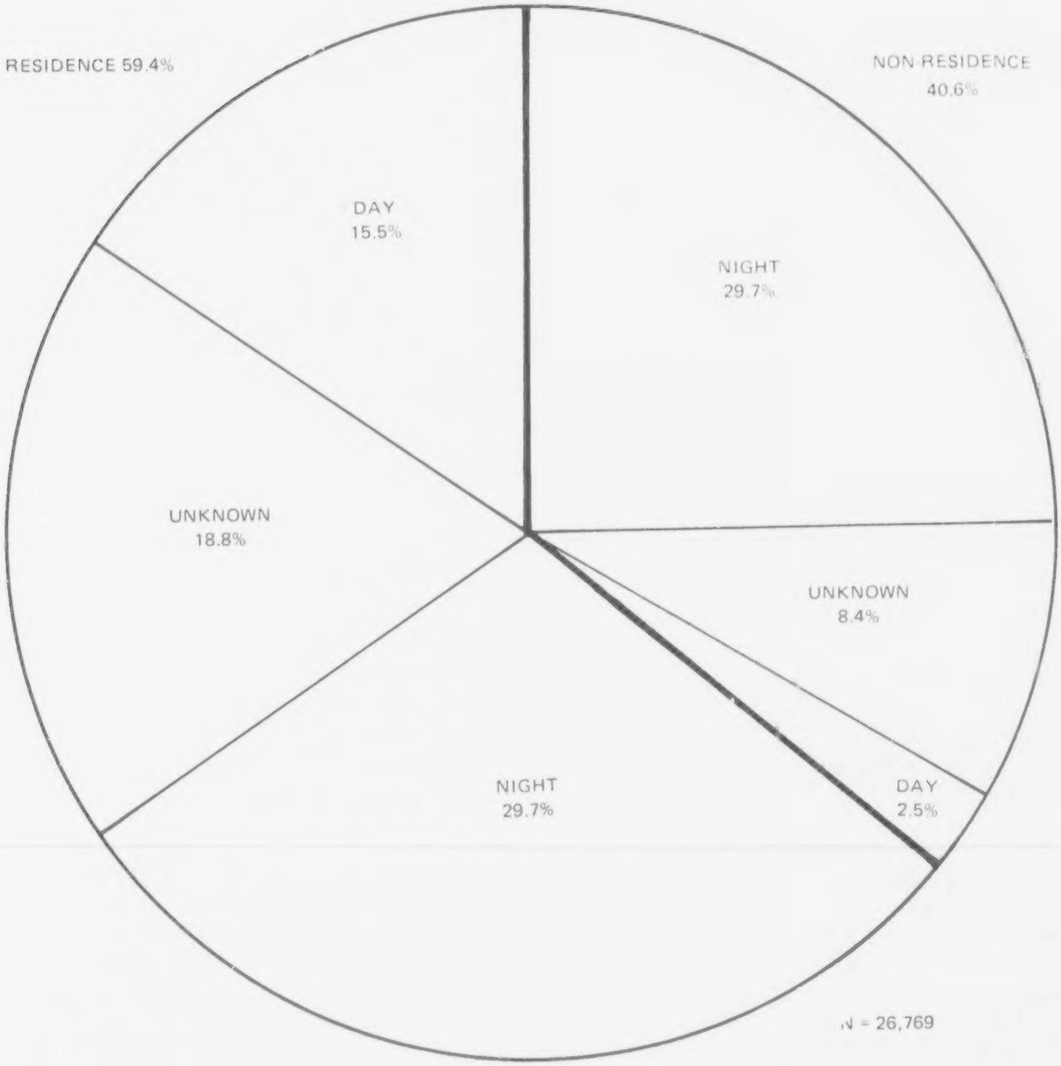

FIGURE 36

Figure 37 shows the same breakdown, but for dollar losses rather than burglary frequency. Non-residential night time burglary accounted for nearly one-third (32.1%) of the reported dollar losses from burglary during 1979. This was 76.6% of the dollar losses from non-residential burglaries during 1979. Night residential burglaries accounted for 23.0% of the total dollar loss from burglaries during 1978, and 39.6% of the dollar losses from residential burglary.

DOLLAR LOSSES FROM BURGLARY, 1979

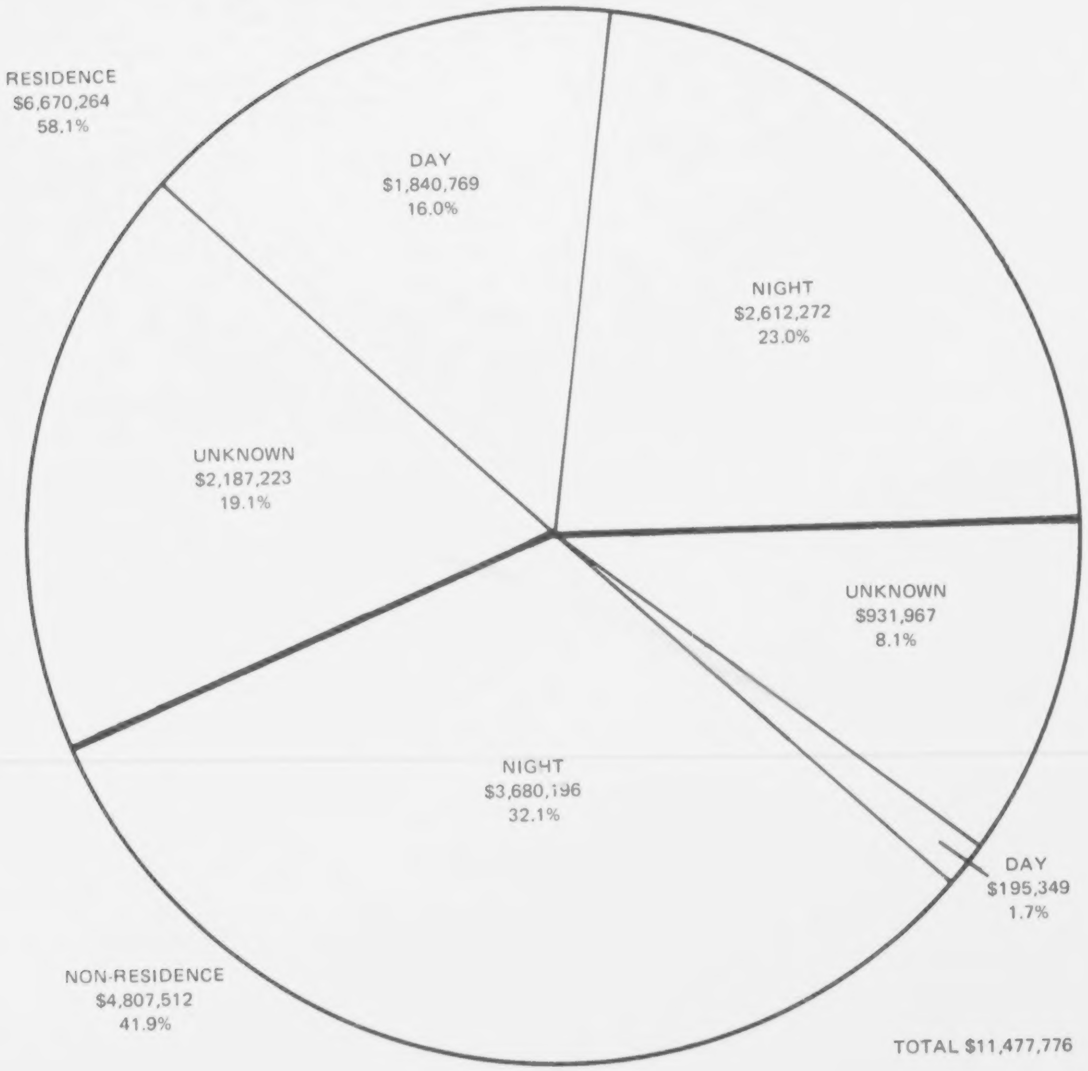

FIGURE 37

TYPES OF ENTRY, BURGLARY, 1979

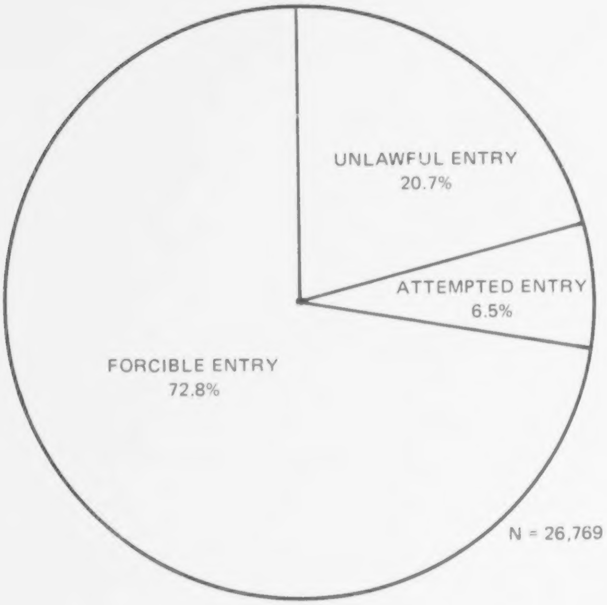

FIGURE 38

The types of entry in burglaries are shown in Figure 38. This distribution is similar to those for previous years, with forcible entry being most common in each year.

9. Larceny

The monthly trends of larcenies reported in 1978 and 1979 are shown in Figure 39. The pattern of larcenies is similar to those of property crime and total crime shown earlier. This is to be expected, in light of the fact that larceny accounts for nearly 70% of total Part I crime.

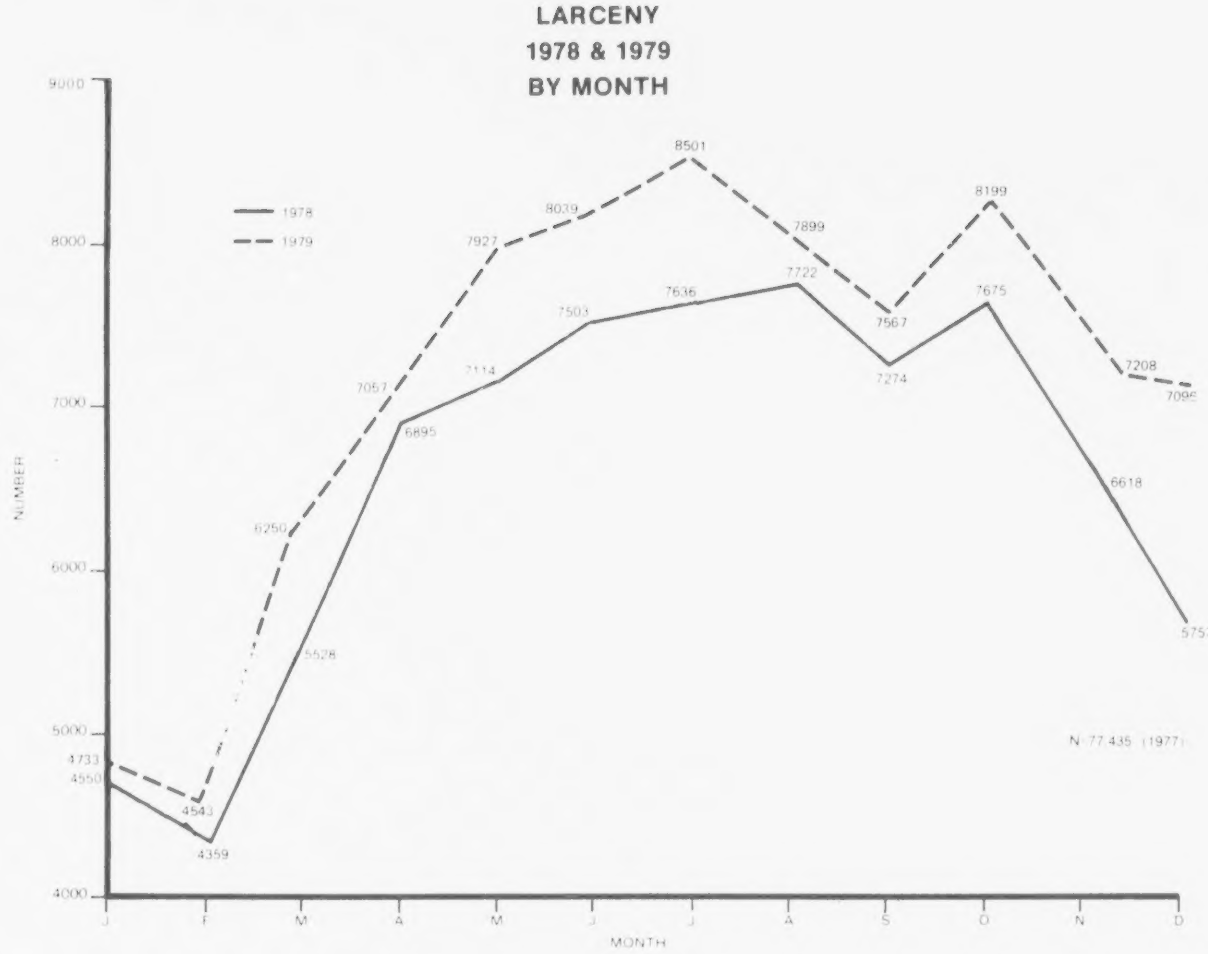

FIGURE 39

Figure 40 depicts the distribution of larcenies for 1979. This distribution is generally similar to that for 1978. Thefts of motor vehicle accessories accounted for 17.2% of the reported larcenies in 1979, while bicycle thefts and larcenies from buildings each accounted for 15.7% of the 1979 larcenies. Larcenies from motor vehicles made up 14.4% of the total larcenies in 1979.

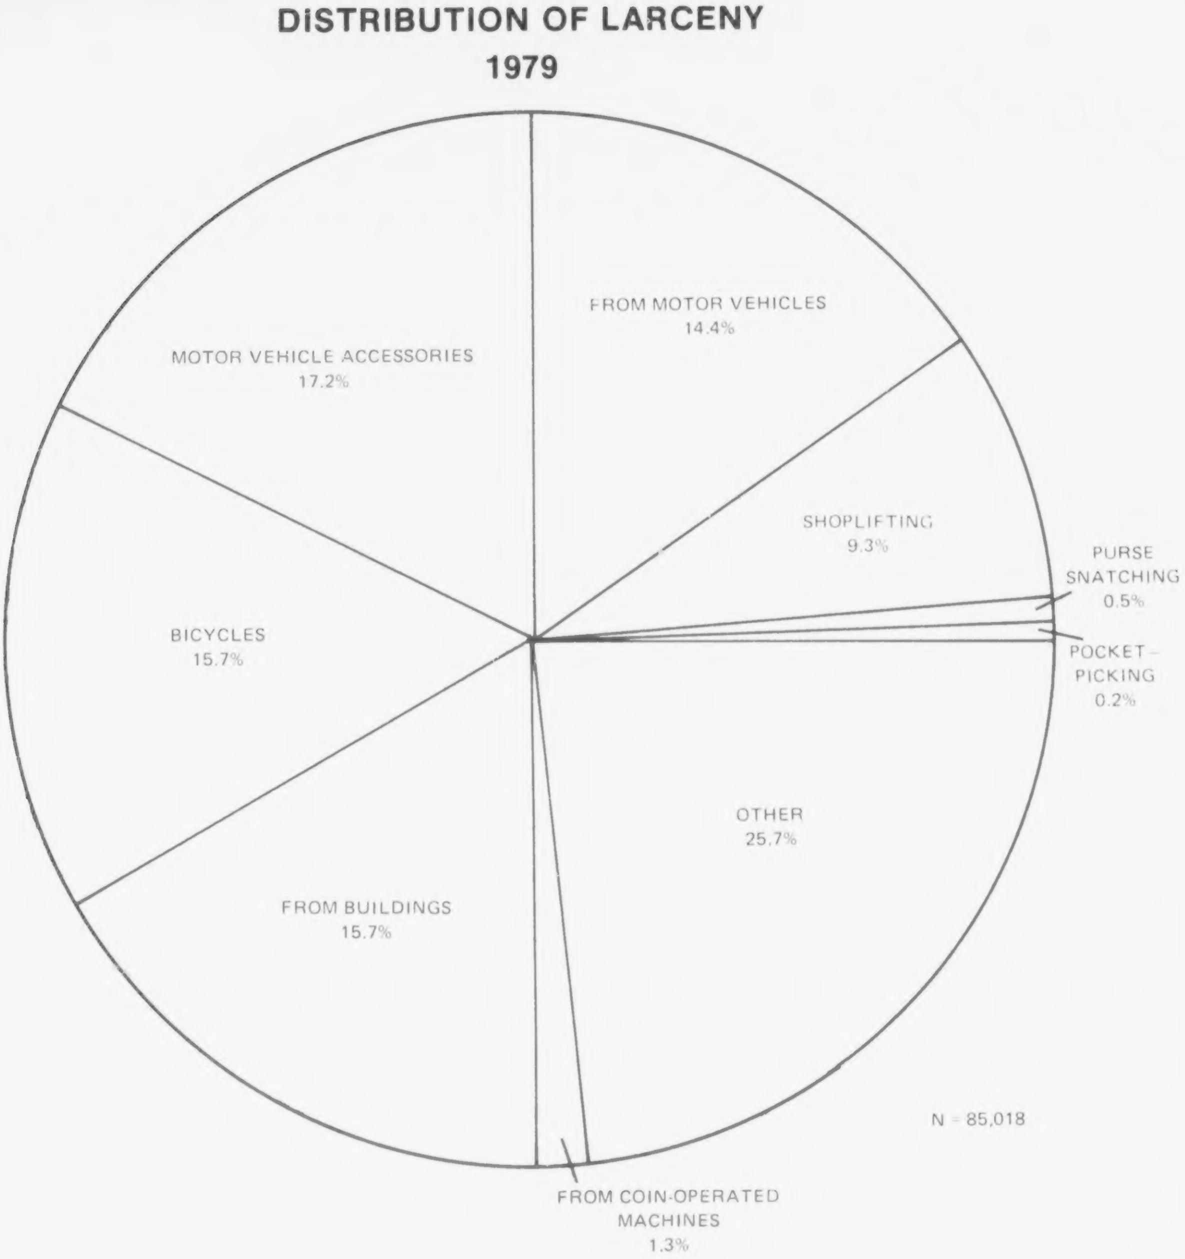

FIGURE 40

Figure 41 shows the percent change in larceny between 1978 and 1979, for the same breakdown as Figure 40. Only the "pocket-picking" category showed a major decrease (-25.6%). Larcenies from coin machines increased 28.0%, while shoplifting rose 20.0%.

PERCENT CHANGE IN LARCENY, 1978-1979

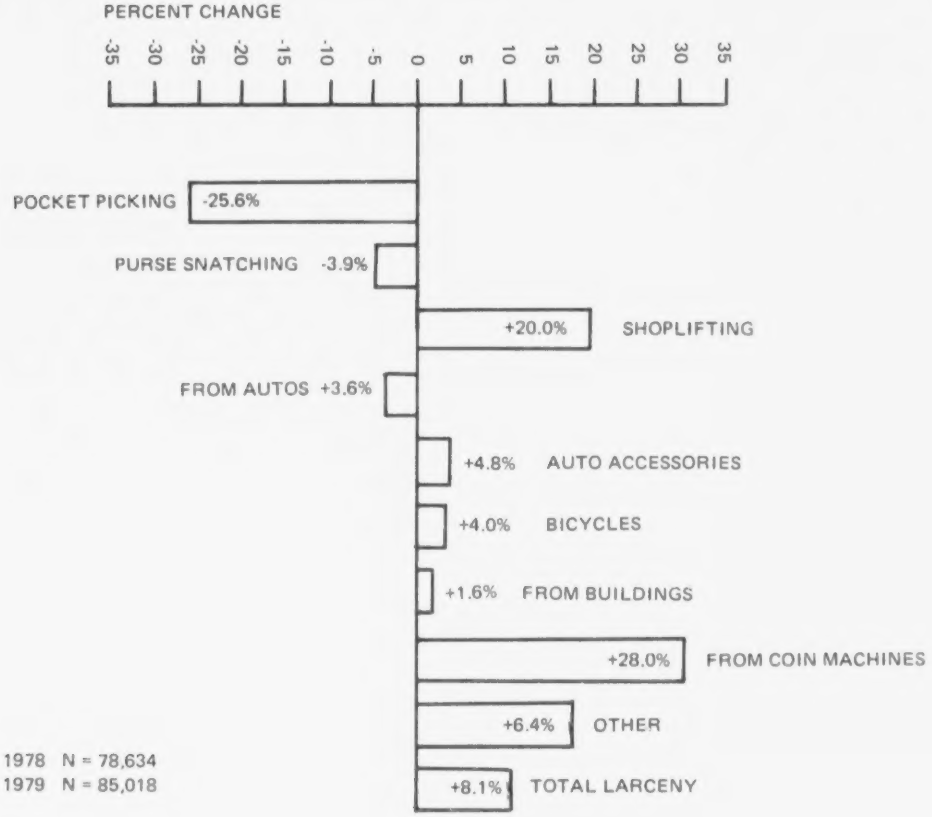

FIGURE 41

Tables IV and V and Figures 42 and 43 provide additional information on larcenies in Iowa. Table IV presents a percentage breakdown of larcenies, by type, from 1973 through 1979. The data show that only minor changes have occurred in the distribution of larcenies during these seven years. However, some increase (from 15.5% in 1973 to 25.7% in 1979) has occurred in "other" larcenies and declines have occurred in bicycle thefts and in the proportion of larcenies from buildings. Table V shows raw numbers of occurrences of larceny, by type, from 1975 through 1979. The sharpest increases during this time occurred in thefts of auto accessories (up 27.2%) and in shoplifting (increased 25.5%).

Total	85,018	78,631	77,435	82,121	66,998	+26.9

Dollar losses from larcenies reported in 1979 are depicted in Figure 42. The "other" category accounted for 42.1% of the reported dollar loss. Larcenies from buildings resulted in dollar losses of $2,945,451, or 19.1% of the total larceny dollar loss. Motor vehicle-related larcenies, combining both the "motor vehicle accessories" and "from motor vehicle" categories accounted for 28.4% of the total dollar loss from larcenies.

DOLLAR LOSSES FROM LARCENY, 1979

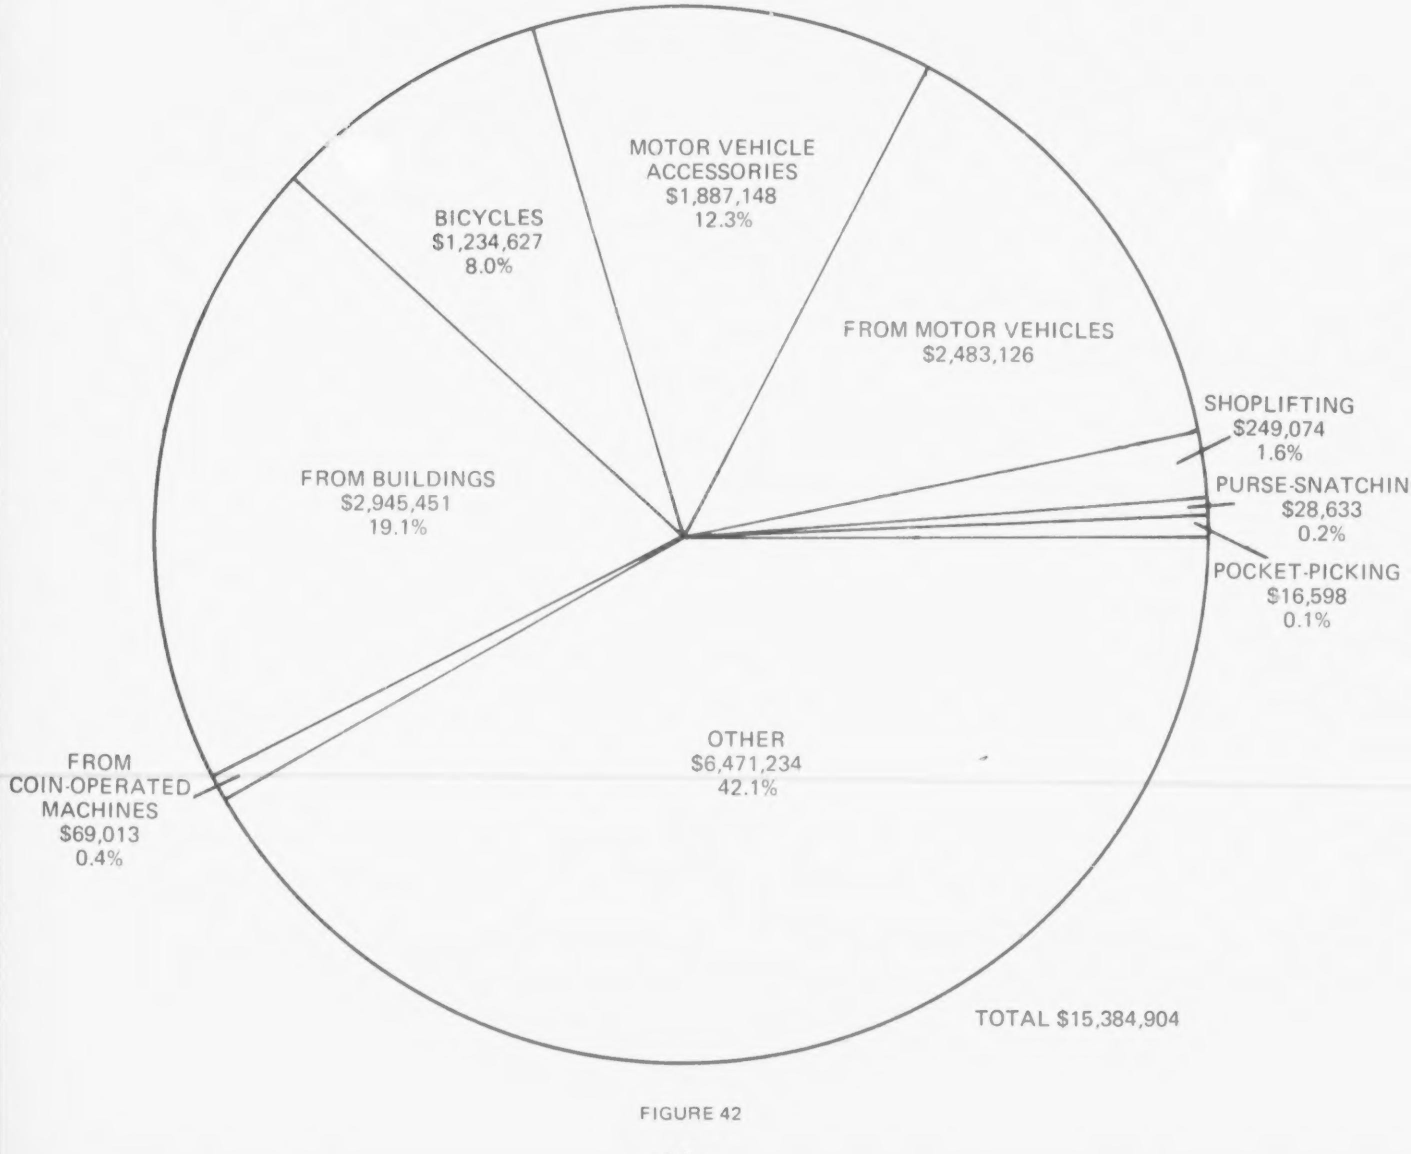

FIGURE 42

AVERAGE DOLLAR LOSS FROM ROBBERY, BURGLARY, AND LARCENY
1979

Figure 43 presents the average dollar losses from robbery, burglary, and larceny in 1979, by type. Bank robberies were the most remunerative crime in 1979, as in previous years, with an average dollar loss of $2,719. Robberies generally were more profitable than burglaries, which in turn, involved a larger average dollar loss than did larcenies. The lowest average loss was for shoplifting ($32).

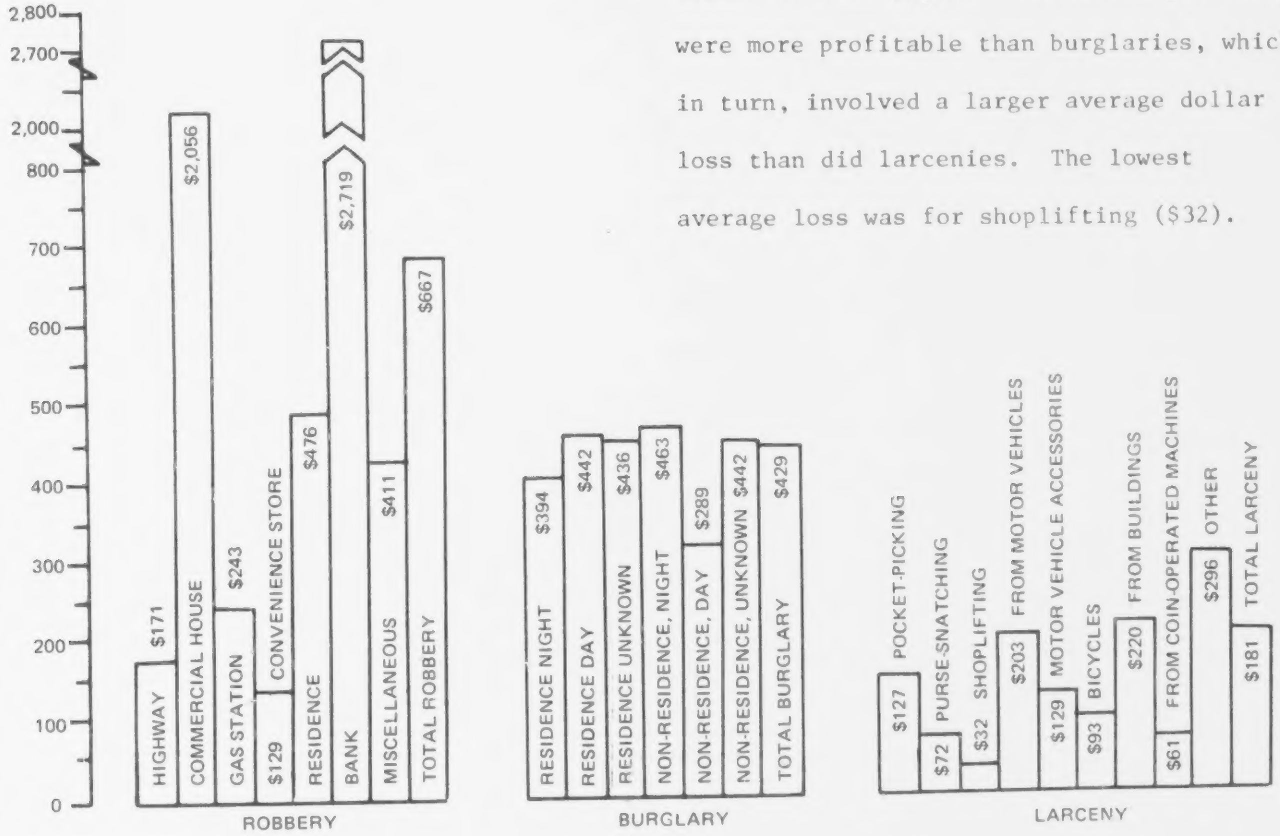

FIGURE 43

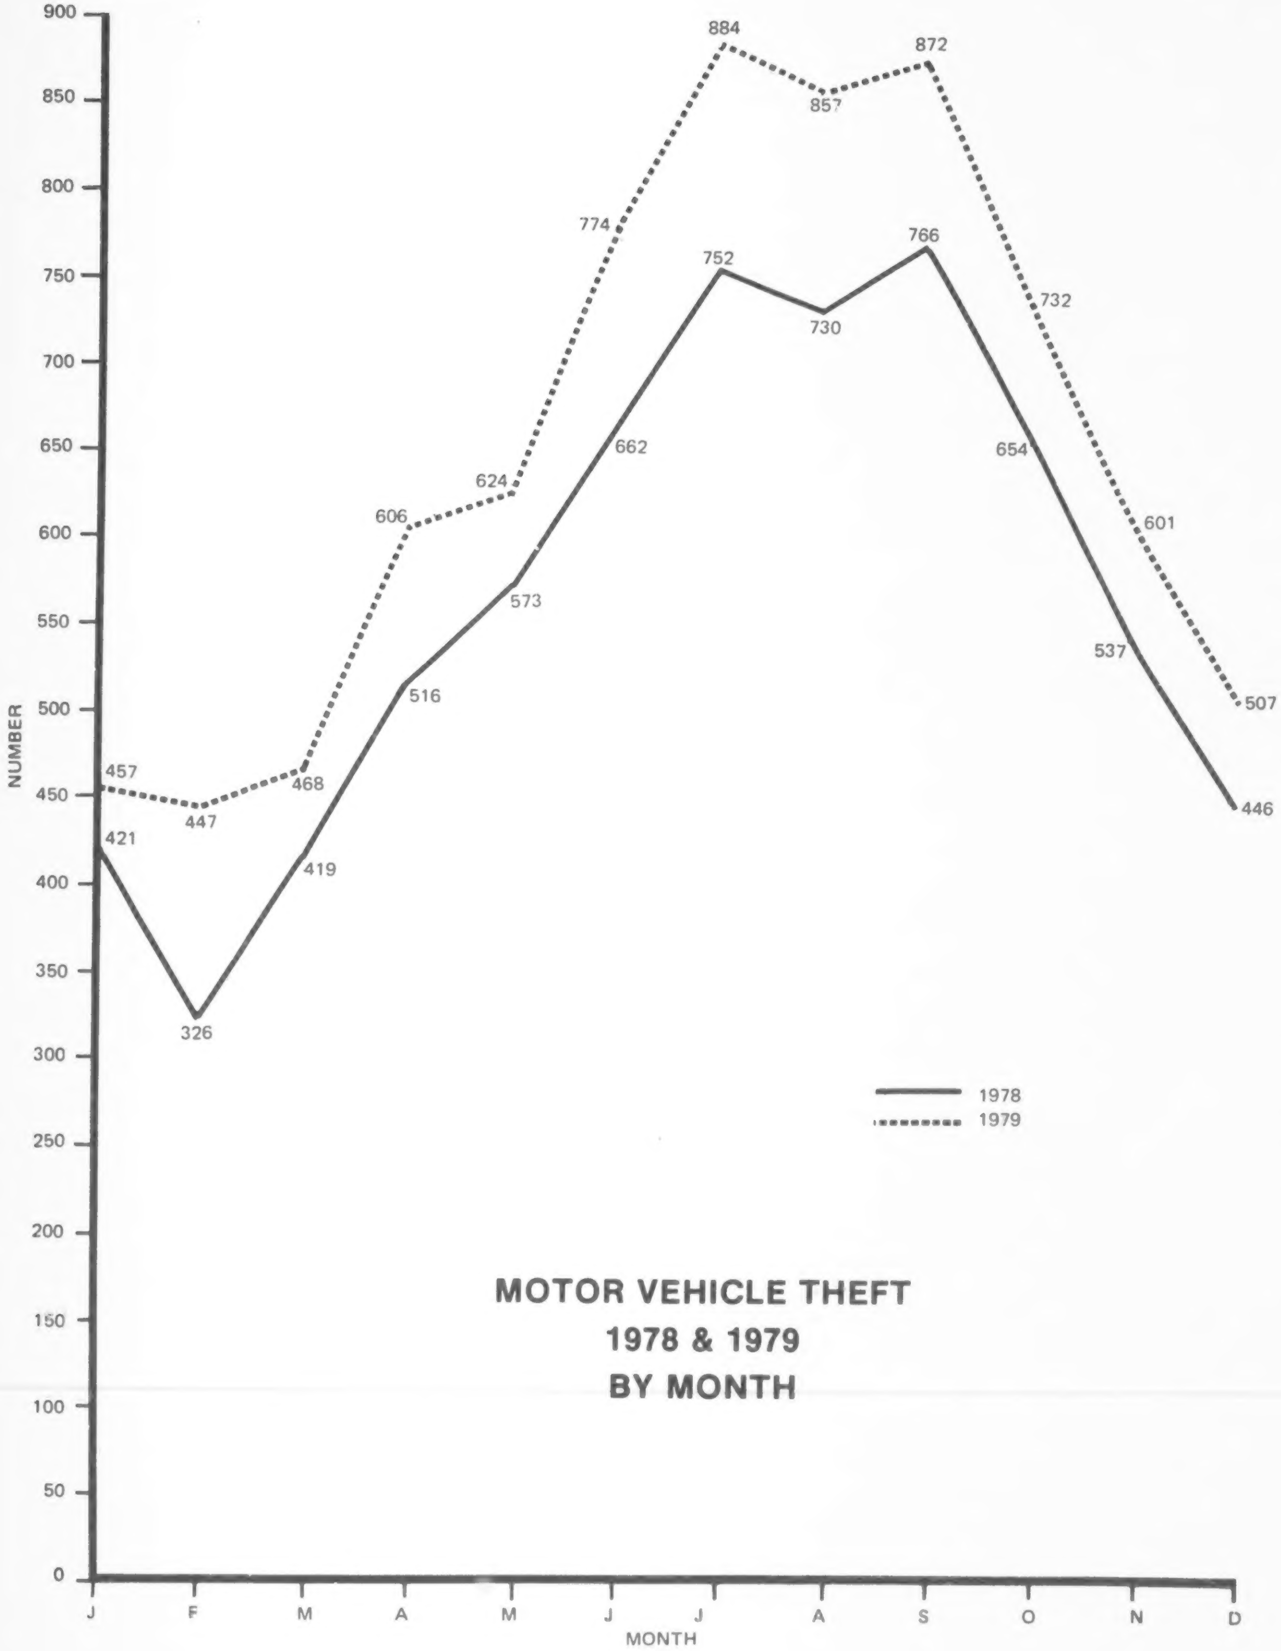


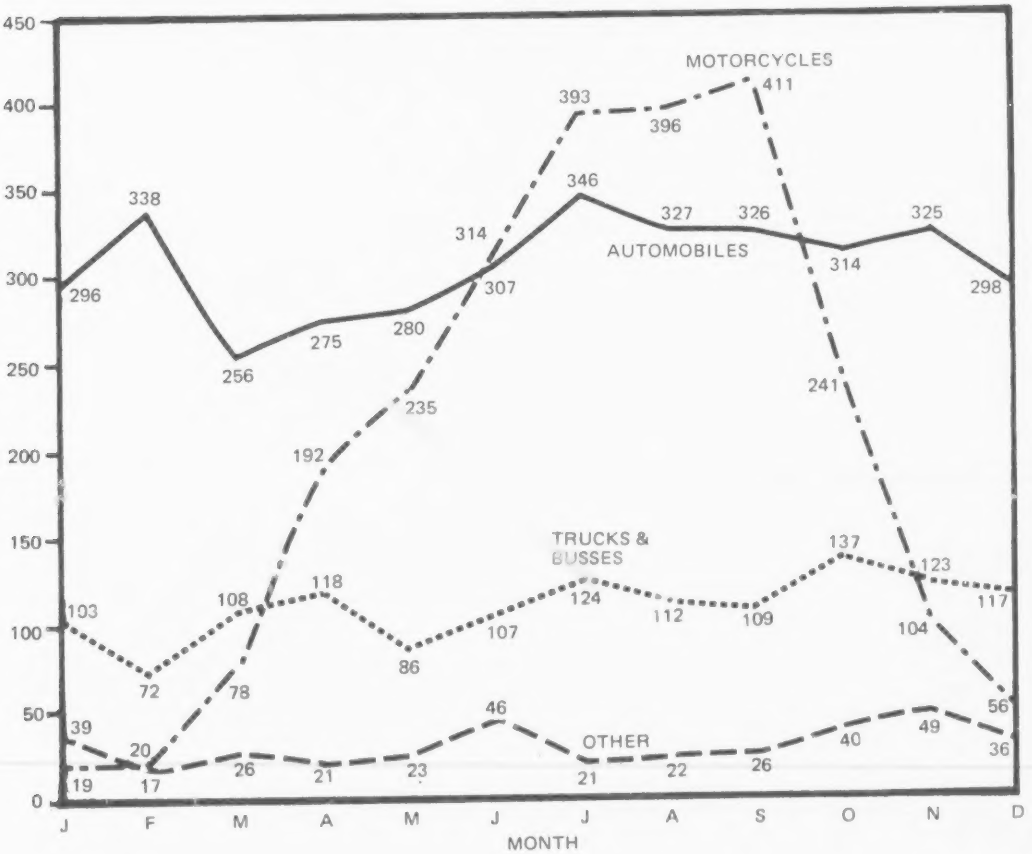
MOTOR VEHICLE THEFT
1978 & 1979
BY MONTH

FIGURE 44

10. Motor Vehicle Theft

The monthly figures for motor vehicle thefts during 1978 and 1979 are shown in Figure 44. A marked seasonal pattern is apparent, with motor vehicle thefts peaking in summer and early fall. To further examine this trend, Figure 45 is presented. It is apparent that motorcycles account for most of the seasonal variation in motor vehicle thefts. During the warm-weather months of July, August, and September, motorcycle thefts exceeded automobile thefts.

TYPES OF MOTOR VEHICLES STOLEN, BY MONTH
1979



N= 7,829

FIGURE 45

Figure 46 illustrates the distribution of motor vehicles stolen in 1979. As in prior years, automobiles were stolen most frequently, followes by motorcycles, trucks, other vehicles, and busses. Automobiles made up nearly half of the vehicles stolen in 1979 (47.1%). However, this was a decrease from 1978, when 54.7% of the motor vehicle thefts reported were of automobiles. Motorcycles accounted for 31.4% of the reported motor vehicle thefts in 1979, compared to 24.1% in 1978. In fact, motorcycles almost entirely accounted for the rise in reported motor vehicle thefts between 1978 and 1979. There was a 49.6% increase in motorcycle thefts in 1979 over 1978. At the same time, automobile thefts declined slights (0.9%) between 1978 and 1979.

TYPES OF VEHICLES STOLEN, 1979

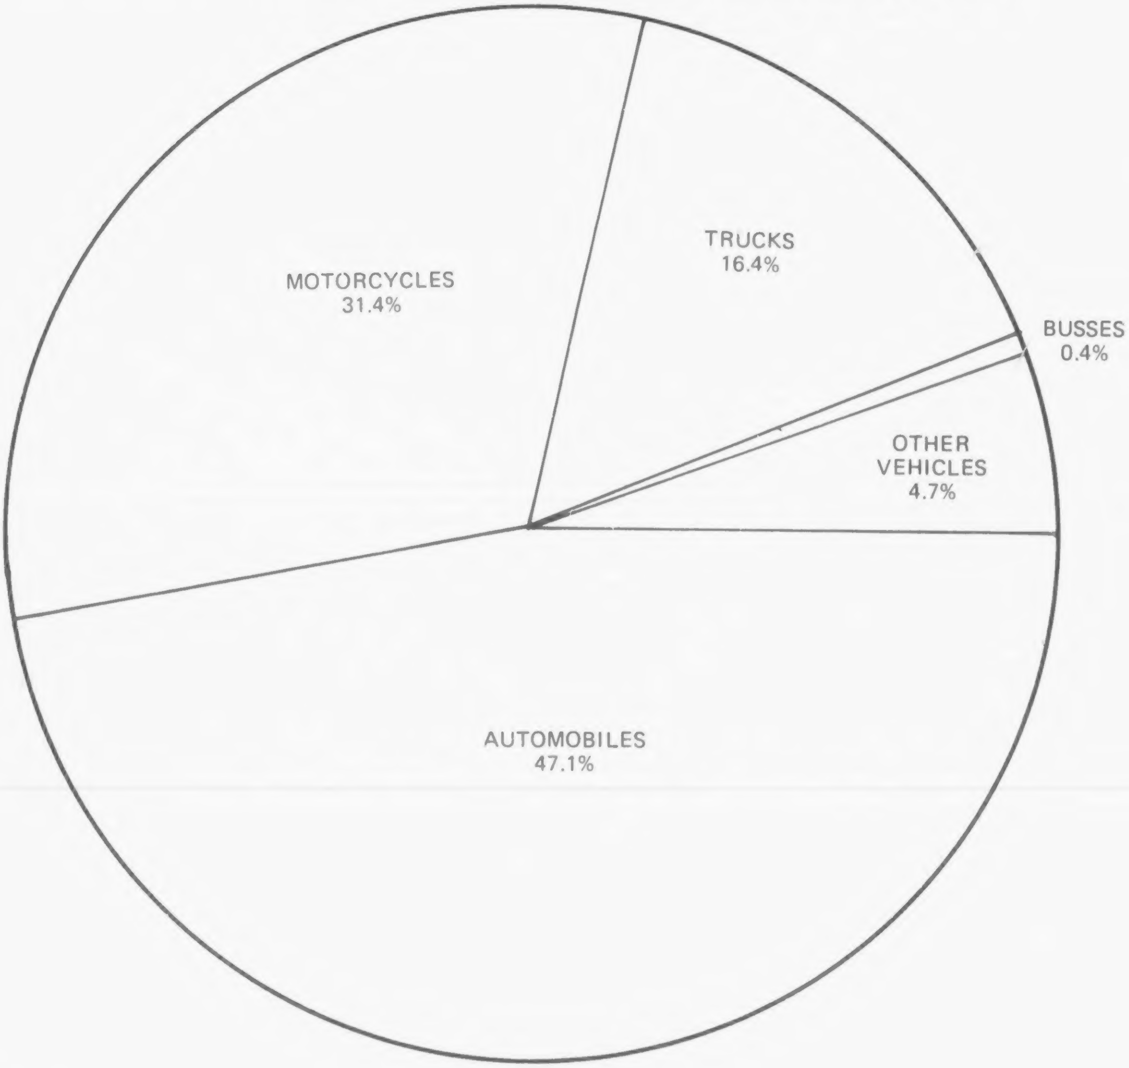


FIGURE 46

D. Rate of Change, by Population Category

Tables VI and VII contain another presentation of percentage change data for Standard Metropolitan Statistical Areas, non-suburban cities (also referred to in Uniform Crime Reports as "Other Cities"), and rural areas. Table VI presents the raw number of offenses and the crime rates for each of these areas for the total crime index, violent crime, and property crime, while Table VII presents percentage changes during the past five years for each Part I offense. Table VI, containing percentage change both in the raw number of offenses and in offense rate, illustrates how population shifts can affect crime data. In the urban areas, populations have risen in Iowa since 1975, resulting in a raw numerical percentage increase which is slightly larger than the rate increase. In rural areas, the opposite is true.

In the total crime index category, SMSAs have experienced the largest percentage increases in both raw crime counts and the total crime rate since 1975. All types of areas in Iowa have experienced increases in their Part I crime rates since that time.

In the violent crime category, SMSAs have shown by far the largest increase, both in percent and raw number, with non-suburban cities showing a much smaller increase. Violent crime in rural areas was lower in during the past two years than in 1975.

SMSAs experienced the smallest percentage increase in the property crime rate since 1975, with rural areas showing the greatest percentage change. As with total Part I crimes, all types of areas in the state have had increases in the property crime rate since 1975.

E. Geographical District Data

Table VIII presents crimes reported, crime rates, and crime rate percent change by geographical district in 1979. These districts, which are presented in Figure 45, were developed for analytical purposes for this report.

According to the reported offense data in the first portion of Table VIII, district five, the counties in central Iowa surrounding Des Moines, with 21 percent of the state's estimated population, accounted for 27 percent of Iowa's reported index crime in 1979. District nine, the agricultural counties between the Missouri border and district five, accounted for the fewest number of reported crimes. This area is also by far the least populated geographical district.

Because of the nature of geographical district nine, it similarly is not surprising to find it with the lowest crime rate of any of the districts. There appears to be a relationship between population density and crime rate, although this relationship is not perfect: district five, with the highest crime rate, is not the densest area of the state, which, instead is found in district seven. The three districts possessing the lowest population density are also the three having the lowest crime rates.

Looking at the percentage change table, we can see that all nine geographic districts shared in the general increase in reported index crime experienced by Iowa in 1979. The largest increase in percentage terms, occurred in district one, which is in the northeast portion of the state, and includes the metropolitan areas of Dubuque and Waterloo-Cedar Falls.

F. National Comparison

Table IX presents index crime and crime rate data for Iowa for each category of index crime for 1971 through 1979, along with the State's national rankings for each category for 1971 through 1978. The national rankings are based on figures published by the FBI, which were not available for 1979 at the time of this writing.

This data are presented to place Iowa's increases in reported crime during the 1970's in a national context. The national rankings shown in the table indicate little change in Iowa's relative position in comparison to other states since the early 1970's. In other words, Iowa's increases in reported crime during the past decade have reflected a national trend.

In five of the seven categories of index crime, Iowa's reported crime rate in 1978 was among the ten lowest of the fifty states. The exceptions were larceny, in which Iowa ranked 19th of the 50 states, and motor vehicle theft, in which Iowa ranked 40th of the 50 states. That is, thirty-one other states had lower larceny rates than did Iowa in 1978, while ten other states had lower rates of motor vehicle theft than did Iowa.

Larceny is the only category of index crime for which Iowa's rate has exceeded the median of the 50 states during the period for which data are shown in the table. Even so, Iowa's larceny rate was below the national rate in 1978. By way of contrast, Iowa has consistently ranked among the lowest states in the rate of reported violent crime. In every year since 1973, only three states have had lower violent crime rates than Iowa's.

G. Arson

As explained earlier, arson has been incorporated in the Uniform Crime Reporting system as a Part I offense as of 1979. However, arson is excluded from crime index figures, in order to maintain comparability with data from prior years. In this section, statewide arson data for 1979 are presented.

Figure 48 displays a breakdown of arsons reported to law enforcement agencies in 1979 by type of property involved. The largest single category is arsons involving motor vehicles, which were 20.4% of the 849 arsons recorded during 1979. Altogether, mobile property was involved in 23,9% of the reported arsons. The majority of reported arsons involved buildings (61.0%). Residential property accounted for 29.1% of the total arson fires reported.

Figure 49 shows a breakdown of estimated dollar loss from arsons reported during 1979. Over one quarter (26.2%) of the total dollar loss was attributed to arsons involving commercial property. Single occupancy residences followed with 23.1% of the total estimated dollar loss.

Overall, there were 849 arson fires reported during 1979 resulting in a total estimated dollar loss of $5,987,939. This is an average loss of $7,053 per arson incident.

III. JURISDICTIONAL DATA

A. Crimes Reported

Table X presents a series of tables dealing with the number of crimes reported by jurisdictions, beginning with counties and ending with rural areas. Jurisdictions within these tables are presented in rank order by the number of crimes reported. It will be noted, however, that this series tends to follow population rank because of a high association between crimes reported and population.

Throughout this series of tables there is a tendency for the most populous jurisdictions in a given population category to contain the largest raw number of crimes, and the smallest to contain the fewest reported crimes. Some significant exceptions to this observation are found, however, as indicated by the following examples:

1. Sioux County reported fewer crimes than did many smaller counties;
2. Clive, with a population of 4,560, reported more crimes than did several larger suburban cities and all except three cities in the 5,000 to 10,000 population category;
3. Nevada, with 5,600 population, but with fewer reported crimes than all except seven of the 53 cities in the under 5,000 category;
4. in rural areas, where little discernable relationship between population and crimes reported is evident.

TABLE X-A

CRIMES REPORTED, COUNTIES
BY RANK

B. Crime Rates by Population

Table XI is a series of tables presenting information on crime rates by jurisdiction. Within each category, jurisdictions are arranged by population. It is apparent from these tables that, generally speaking, there is a relationship between crime rates and population. Figures 50 and 51 are intended to further assist in interpreting this data. Figure 50 portrays crime rates by county, while Figure 51 shows crime rates for rural areas by county.

Both Figures 50 and 51 indicate that crime rates tend to be lower in the northwest corner of the state than elsewhere.

TABLE XI-A

CRIME RATES, COUNTIES
BY POPULATION

County	Population	Crime Index	Violent	Property	Murder	Rape	Robbery	Aggravated Assault	Burglary	Larceny	Motor Vehicle Theft

C. Crime Rates by Rank

Table XII presents the same information as Table XI, ranked in order of crime rate rather than population. Table XI-A, which shows 1979 crime rates by county, indicates that higher crime rates are characteristic of more populous counties. However, there are exceptions to this tendency. For example, Cerro Gordo county, which is the eleventh most populous county in the state, had the fourth highest crime rate during 1979. This is similar to the pattern found in 1978, when Cerro Gordo county had the third highest crime rate, and to the pattern found in 1977, when its rate was fourth highest of the 99 counties. On the other hand, Dubuque county, with the sixth highest population, had the tenth highest crime rate during 1979, and the twelfth highest rate during 1978.

Table XII-B shows crime rates by rank for the state's seven Standard Metropolitan Statistical Areas. Pottawattamie county, which is Iowa's second smallest SMSA, had the second highest crime rate in 1979. Dubuque county, the third least populous SMSA, had the lowest rate of every category of crime shown in Table XII-B.

Table XII-C displays crime rates for cities over 50,000 population. In this category, Des Moines, the state's largest city, had the highest overall crime rate during 1979. In 1976, Cedar Rapids had the highest crime rate in this category, in 1977, Council Bluffs did, and in 1978 Des Moines had the highest rate.

In the 25,000 to 50,000 category (Table XII-D), Iowa City had the highest crime rate*, followed by Mason City. Ottumwa had the lowest violent rate in this category.

---

*In evaluating the data shown here, it should be recalled that the University of Northern Iowa, State University of Iowa, and Iowa State University each report separately from the respective cities in which they are located.

Among cities of 10,000 to 25,000 people (Table XII-E), Ames had the highest crime rate*. However, only in the property, larceny, and motor vehicle theft categories did Ames lead this group. Coralville, the smallest city in this category, had the highest violent crime rate for the second year in a row. Marion had the lowest rates for every category shown.

Figure 52 and Table XIII further illustrate crime rate comparisons for the state's major cities (over 10,000 population). In each case, cities' total crime rates are compared with other cities within the same population groupings. It is apparent from Figure 52 that central cities with higher than average crime rates are not always accompanied by suburbs with relatively high crime rates. Further, no geographic pattern in major city crime rates is apparent.

Returning to Table XII, crime rates for cities of 5,000 to 10,000 population are shown in Table XII-F. Evansdale, Altoona, Chariton, and Glenwood, four of the smallest cities in this category, had above average crime rates, while Carroll and Charles City, among the largest cities shown in Table XII-F, had below average rates for this category.

Table XII-G gives crime rates for cities of under 5,000 population. Here, there is little apparent relationship between population and crime rate.

Suburban cities' crime rates are shown in Table XII-H. The two suburbs with the highest crime rates are Carter Lake and Clive, both of which are in the smallest population category.

Crime rates for suburban sheriffs are shown in Table XII-I. Polk County, the most populous suburban area, had the highest rate of every crime category shown, except for murder.

Rural areas crime rates are presented in Table XII-J. There is no apparent relationship between crime rates and population on this table.

TABLE XII-A

CRIME RATES, COUNTIES
BY RANK

County	Population	Crime Index	Violent	Property	Murder	Rape	Robbery	Aggravated Assault	Burglary	Larceny	Motor Vehicle Theft

MAJOR CITIES' CRIME RATES
1978 AND 1979

	1978	1979		1978	1979
Davenport	-	-	Fort Dodge	+	-
Sioux City	-	-	Spencer	+	-
Dubuque	-	-	Cedar Falls	-	+
Ottumwa	-	-	Burlington	-	+
Bettendorf	-	-	Waterloo	+	+
Marshalltown	-	-	Des Moines	+	+
Muscatine	-	-	Council Bluffs	+	+
Marion	-	-	Clinton	+	+
Fort Madison	-	-	Mason City	+	+
Ankeny	-	-	Iowa City	+	+
Boone	-	-	West Des Moines	+	+
Newton	-	-	Ames	+	+
Indianola	-	-	Keokuk	+	+
Urbandale	-	-	Oskaloosa	+	+
Cedar Rapids	+	-	Coralville	+	+

D. Rank Ordering of Cities and Counties Regardless of Size

This section presents complete rank orderings of all counties (Table XIV) and cities (Table XV) in the state, of rates for each of the seven index crimes, total property crimes, total violent crimes, and total index crimes. In addition to the 1979 rank ordering and rate, each jurisdiction's 1978 ranking is shown, to facilitate comparisons of jurisdictions' relative positions in the two years.

The following patterns emerge from an examination of Table XIV, which shows crime rate rank orderings for counties:

1. Generally, higher populations are associated with higher crime rates; however, there are exceptions to this observation;
2. There is a tendency for counties' rank-orderings in the two years to be similar. Again, there are exceptions, especially in the violent crime categories, where small numbers of reported offenses are common.

The relationship between population and crime rates is less clear in Table XV, which shows city crime rates by rank. However, it is noteworthy that Des Moines, the state's most populous city, did not have the highest crime rate in any categories. Ames had the highest total crime rate of all the state's cities in 1979, and also led in the property crime category. However, Ames had the highest rate for only one Part I crime, larceny. Other cities with the highest rate of individual categories of index crime were Carter Lake (murder, burglary), Davenport (rape, robbery), Carlisle (aggravated assault)and Adel (motor vehicle theft). Overall, the highest rate of reported violent crime was found in Carlisle.

In viewing these tables, and especially in evaluating rates of reported crime for Ames, Iowa City, and Cedar Falls, it should be kept in mind that the universities in each of these cities reports separately. Further, the student population of each university is subtracted from the estimated population of its respective city, which may artifically inflate these cities' reported crime rates.

TABLE XIV-A

TOTAL CRIME INDEX RATE
COUNTIES, BY RANK

1979 Rank	County	Index Crime Rate	1978 Rank	1979 Rank	County	Index Crime Rate	1978 Rank
1	Polk	7,865.5	1	50	Monona	2,154.2	92

E. Percent Change in Crime Rates

Table XVI presents percent changes for total crime rate, violent crime rate, and property crime rate between 1978 and 1979. As noted in the introduction, one should take particular care in interpreting these results because small increases or decreases in the raw numbers of reported offenses could lead to large percentage increases or decreases. This is particularly true in the violent crime category, even among some of the larger cities. These results should be interpreted cautiously, as variations in the degree to which these crimes are reported can have a large impact, and normal variation of small figures from year to year can show large percentage changes.

Figures 52, 53, and 54 are provided as a supplement to Table XVI, and visually illustrate percentage changes in crime rates for counties from 1978.

TABLE XVI-A

CHANGE IN TOTAL CRIME RATE, VIOLENT CRIME RATE, AND PROPERTY CRIME RATE, IN PERCENT, BY JURISDICTION

COUNTIES

County	Total Change	Violent Change	Property Change
Van Buren	+342.0	-100.0	+374.7

FIGURE 54

F. Comparison: Crime Rate Versus Population Density

Table XVII presents a comparison between crime rate rank in 1979 and county population density. There is some tendency for counties with higher population densities to have higher crime rates. It is particularly true that jurisdictions with the highest crime rates tend to have the highest densities in the state.

TABLE XVII

COMPARISON: CRIME RATE AND POPULATION DENSITY

County	1979 Population	Area In Square Miles	Persons Per Square Mile	Crime Rate Rank	Density Rank

IV. ARREST DATA

A. Part I Arrest Rates

Table XVIII presents arrest rates for index offenses and percentage changes by population category. The highest arrest rates in both 1978 and 1979 occurred in cities over 50,000 population. The lowest arrest rates were in the state's rural areas. Only one population category experienced a decrease in the Part I arrest rate between 1978 and 1979. This was in cities of under 5,000 population which had an arrest rate 4.6% lower in 1979 than in 1978. All other population groups experienced increases in their arrest rates in 1979.

There was a 10.3% increase in the arrest rate for violent crimes between 1978 and 1979, with all population categories except cities under 5,000 people and suburban cities experiencing increases. Of the violent offenses, the arrest rate for aggravated assault showed the largest percentage increase of 17.9%.

The rate of arrests for property crimes rose by 7.8% in 1979 over the 1978 rate, with all population categories except cities under 5,000 population showing increases. One of the property crimes, larceny, had the largest percentage increase in arrest rate (12.2%) between 1978 and 1979.

TABLE XVIII

PART I*
ARREST RATES AND PERCENT CHANGES BY POPULATION CATEGORIES
1978-1979

Population Categories	Grand Total			Violent Crime

B. Part II Arrest Rates

Table XIX shows Part II arrest rates for 1978 and 1979 for population categories. As with Part I arrests, cities over 50,000 population had the highest rates in both 1978 and 1979, and rural areas had the lowest rates.

There was a 5.2% increase statewide in the Part II arrest rate between 1978 and 1979, and most population categories also experienced increases. The most pronounced percentage increases were in suburban cities of 5,000 to 10,000 people (66.1%) and under 5,000 population (45.0%). Three categories showed decreases in 1979 in the Part II arrest rate: suburban cities of 10,000 to 25,000 population (5.4%), cities of over 50,000 population (1.3%) and rural areas (1.1%).

Table XX shows raw numbers of each category of Part II arrests statewide in 1978 and 1979. Overall, there were 5.4% more such arrests in 1979 than in 1978. Several categories showed significant increases between 1978 and 1979. For example, vandalism arrests rose by 13.3%, liquor law violations by 38.9%, and disorderly conduct arrests by 16.2%.

Figure 55 shows monthly trends during 1978 and 1979 of total reported Part I offenses and of Part II arrests. The relatively large number of reported Part I offenses noted during the summer is also reflected in the Part II arrest data, although the latter pattern is less pronounced. The graph also shows that the increase in Part II arrests between 1978 and 1979 was reflected in the monthly figures, except that there were more Part II arrests in August of 1978 than in the corresponding month of 1979. In all other months, the 1978 figure was lower than the 1979 figure.

TABLE XIX

PART II
ARREST RATES AND PERCENT CHANGES BY POPULATION CATEGORIES

Population Categories	Grand Total 1978	Grand Total 1979	Grand Total Percent Change	Other Assaults 1978	Other Assaults 1979	Other Assaults Percent Change

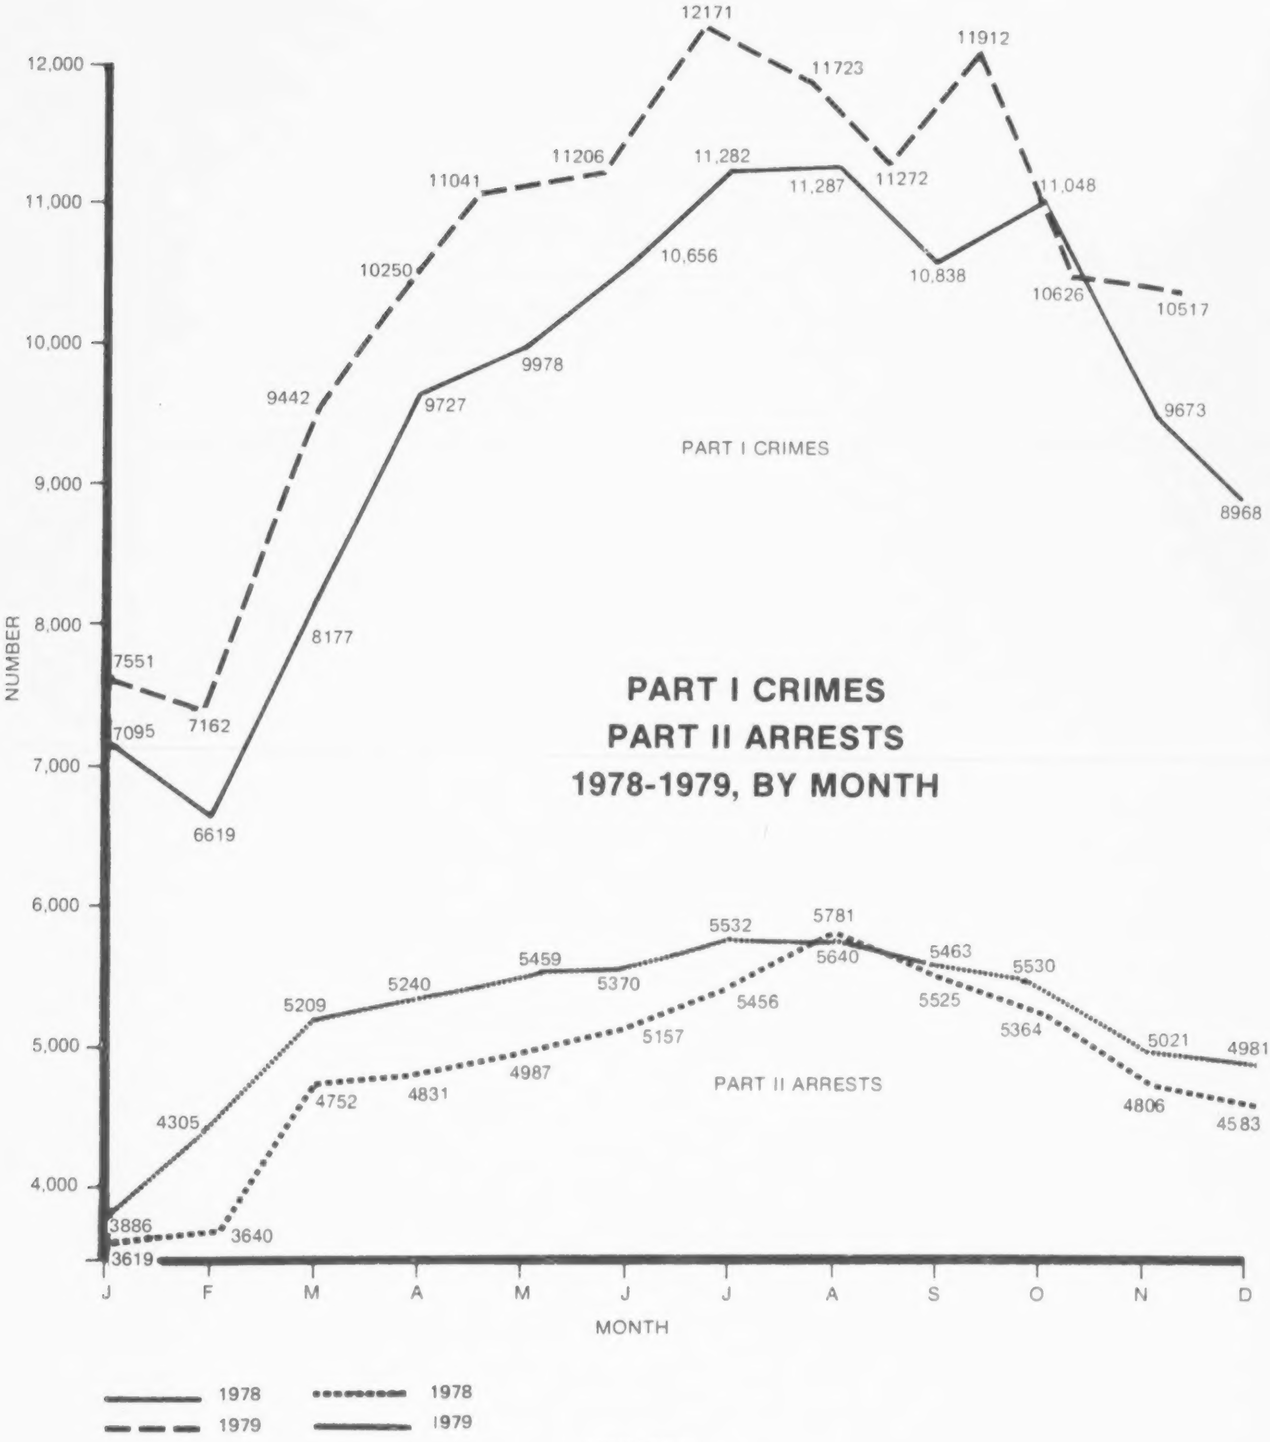
Gambling	49	22	-55.1
Family Offenses	82	3	-96.3
OMVUI	11,397	11,501	+0.9
Liquor Laws	4,827	6,706	+38.9
Drunkenness	12,282	12,728	+3.6
Disorderly Conduct	3,378	3,924	+16.2
Vagrancy	101	151	+49.5
Other Offenses	11,781	11,994	+1.8
Total*	58,500	61,636	+5.4

*Although now classified as a Part I offense, arson is included here for comparison.



PART I CRIMES
PART II ARRESTS
1978-1979, BY MONTH

FIGURE 55

COMPARISON: PART I MONTHLY OFFENSE AND ARREST TRENDS VS. PART II ARREST TRENDS IN PERCENT, 1979

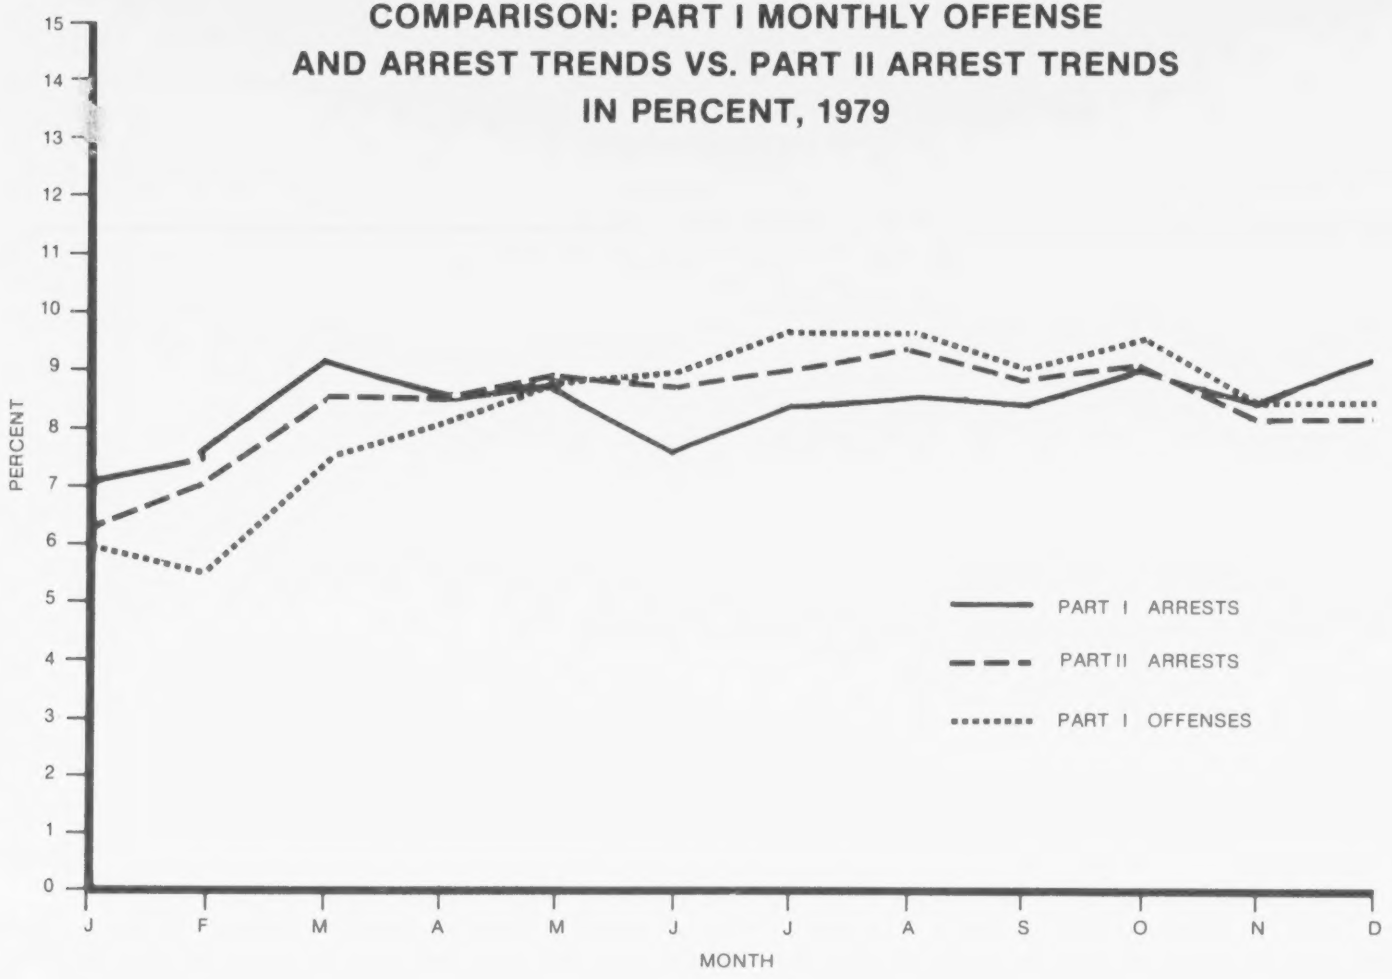


FIGURE 56

C. Clearance Rates

Figures 57 through 59, along with the series of Table XXI tables, deal with clearance rates. Clearance rates have long been accepted as indicators of law enforcement agency performance, although they are neither infallible nor comprehensive in this regard.

Figure 57 illustrates different clearance rates for different Part I crimes, with the violent crimes having relatively higher rates of clearance. Homicide is cleared more frequently (81.5%) than the other crimes, in part due to the seriousness of the crime, the desire of police officials to apprehend perpetrators, and the likelihood that a relationship existed between the perpetrator and the victim. The property crimes, on the other hand, present relatively "low risk" situations for offenders. For example, motor vehicle theft, the property crime most freuqently cleared by arrest, (25.3% during 1979) possesses a clearance rate lower than the violent crime having the lowest clearance rate (robbery, at 29.4% cleared).

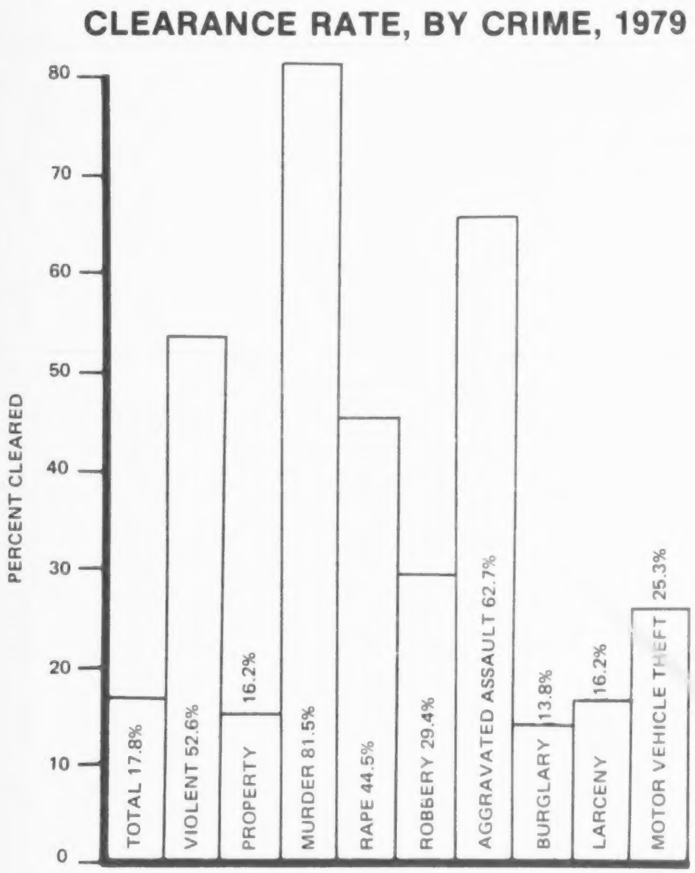

FIGURE 57

Figure 58 presents clearance rates for cities in each population category, and illustrates that little apparent relationship exists between clearance rates and city size.

Figure 59 portrays a more varied picture than did Figure 58, and illustrates that suburban cities generally report higher clearance rates than their non-suburban counterparts. In th suburban cities, larger cities tend to have higher clearance rates, while in non-suburban cities, the relationship between population size and clearance rate is unclear.

As in the case with crime rates, clearance rates may vary considerably betwee jurisdictions within population groups . In Table XXI-A, for example, Sioux City reported a 26.6% clearance rate, while Waterloo's figure was 13.1%. What this means is that Sioux City cleared by arre about one Part I crime in four, while Waterloo cleared about one in seven.

CLEARANCE RATES BY POPULATION CATEGORY 1979

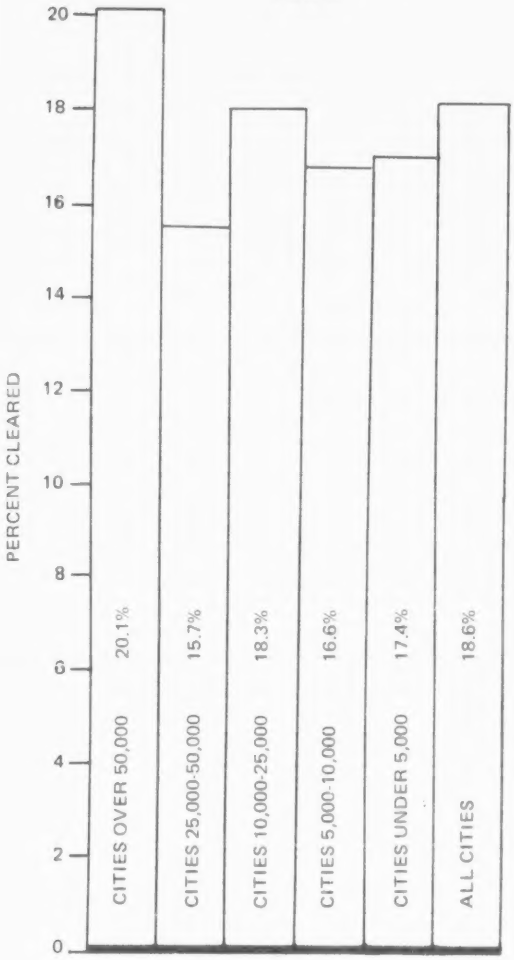

FIGURE 58

The best sources of information needed to property interpret local clearance rates are the local police departments. These should be contacted with regard to other factors which might affect local clearance rates.

D. Demographic Data on Those Arrested

Figure 60 depicts the age distribution of individuals arrested for Part I offenses in 1979, and illustrates distributions both for violent and property offenses. As is evident in the figure, juvenile arrests are predominantly for property crimes. The modal age for property crime arrests in 1979 was 16 years old. In contrast, juvenile arrests for violent crimes are less common, accounting for only 19.3% of these arrests during 1979. This difference in age distribution is similar to the pattern found in earlier years.

Figure 61 presents the age distribution for all Part I and Part II arrests for 1979. It is evident from Figure 61 that the comparison between Part I and Part II arrests is similar to the comparison between violent and property offenders. Juveniles are much more likely to be arrested for Part I offenses than they are for Part II. While 45.0% of all Part I arrests were of juveniles, only 20.4% of the Part II arrests fell in this category.

Figure 62 shows the juvenile and adult percentages of clearances for Part I offenses, and illustrates the relatively small percentage of juveniles accounting for clearances for each of the violent crimes. Robberies were the violent crime for which juveniles were most frequently arrested, with juveniles accounting for 22.2% of robbery clearances during 1979.

With property crimes, however, the juvenile percentage of clearances is higher, with 38.6% of all burglary clearances accounted for by juveniles, 39.3% for larceny, and 37.0% for motor vehicle theft. Thus, while juveniles accounted for only one in seven violent crime clearances, they accounted for more than one of every three property crime clearances

AGE DISTRIBUTION
VIOLENT AND PROPERTY CRIME ARRESTS, 1979

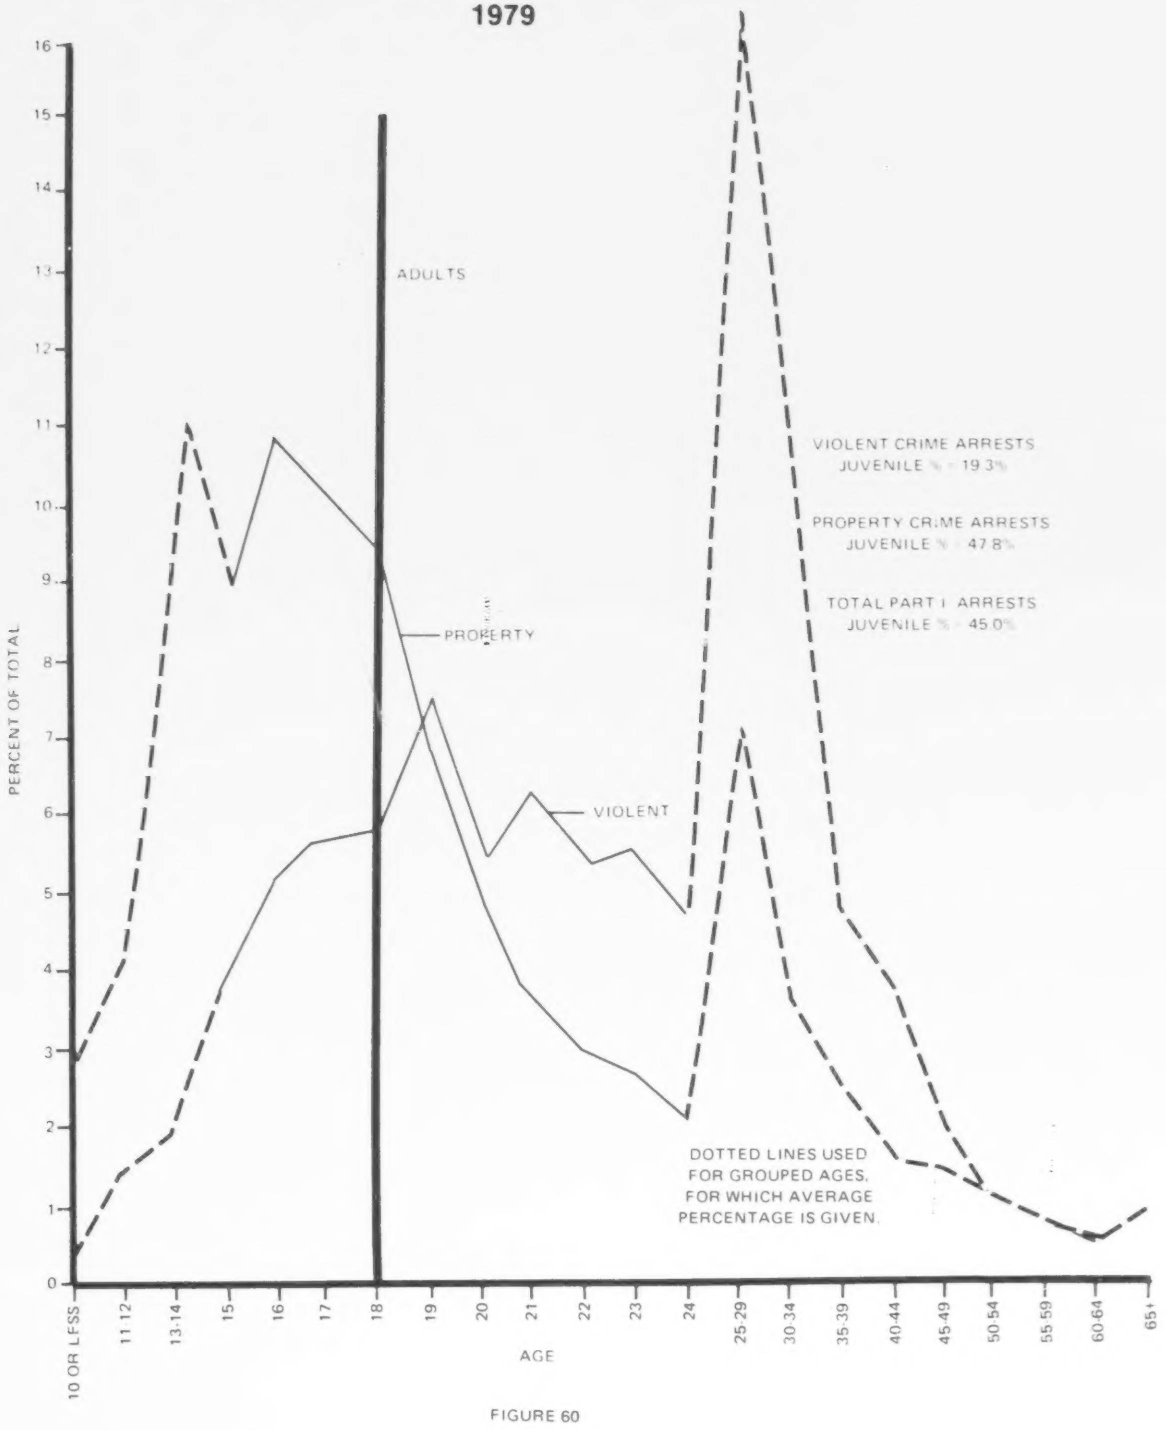

FIGURE 60

AGE DISTRIBUTION PART I AND PART II ARRESTS 1979

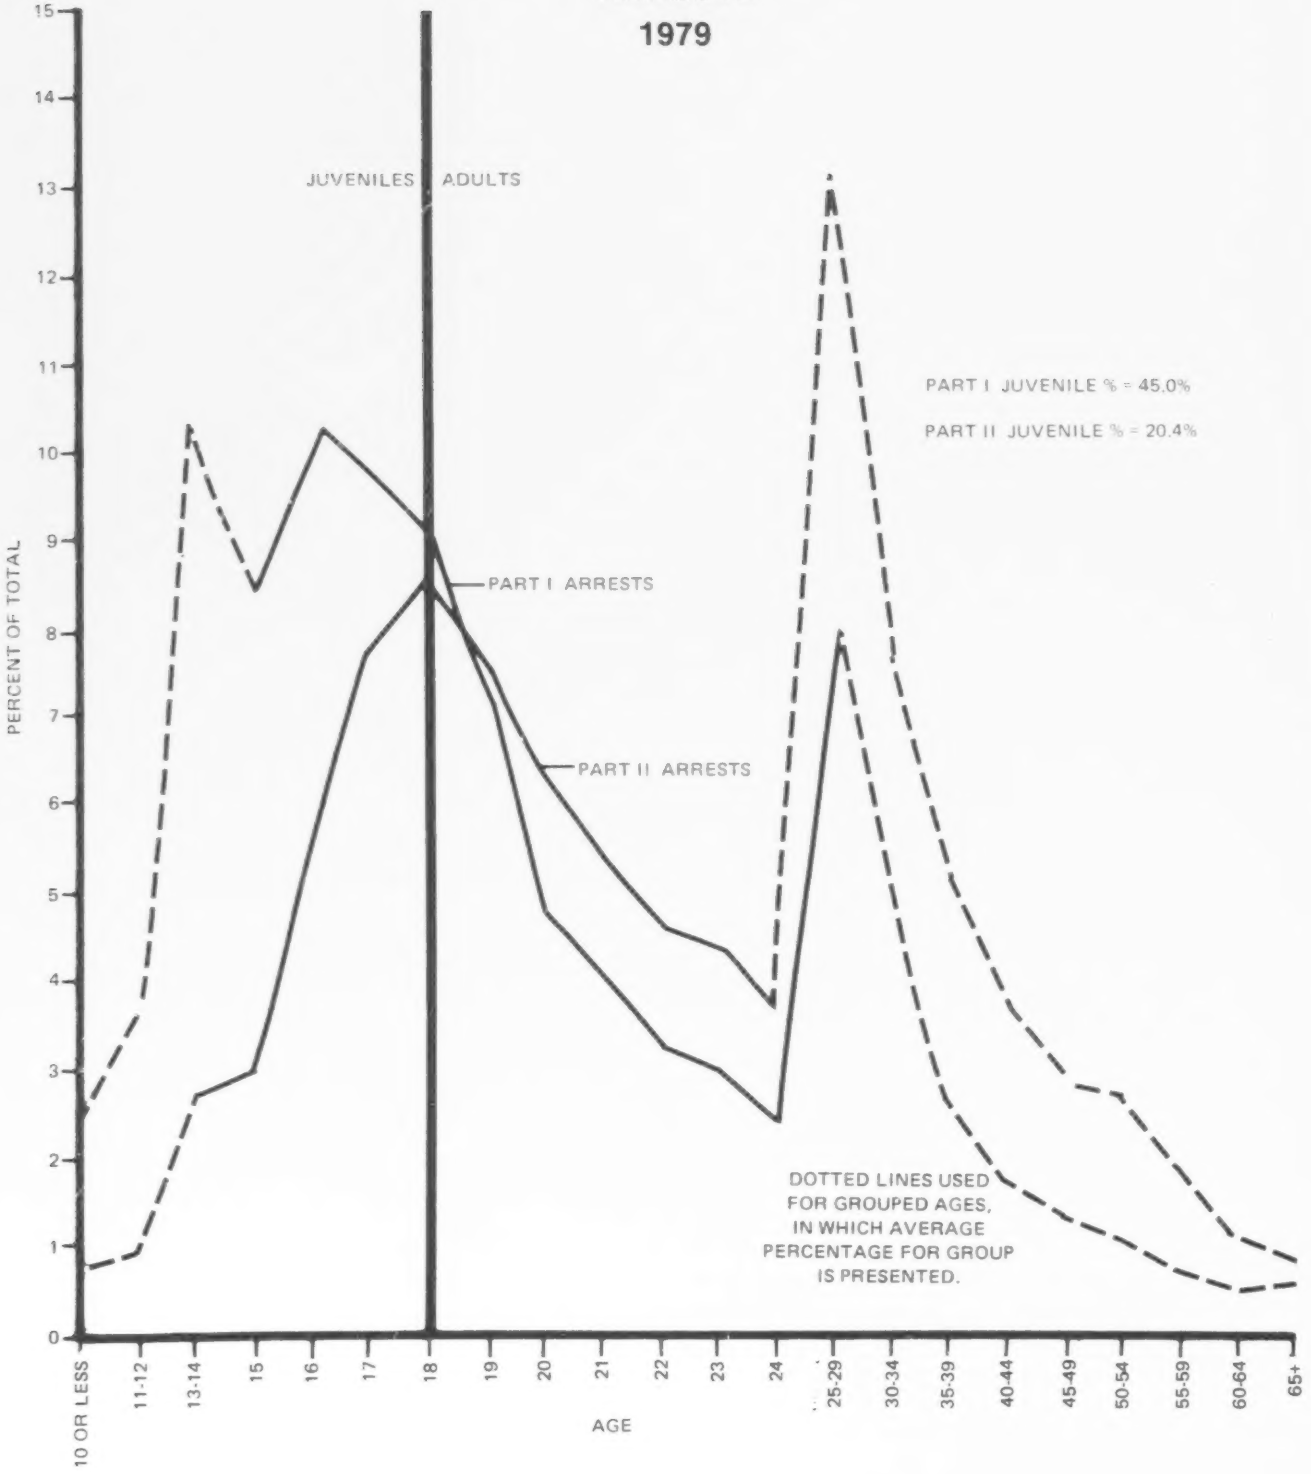

FIGURE 61

PERCENT OF CLEARANCES ATTRIBUTABLE TO ADULTS AND JUVENILES, BY OFFENSE, 1979

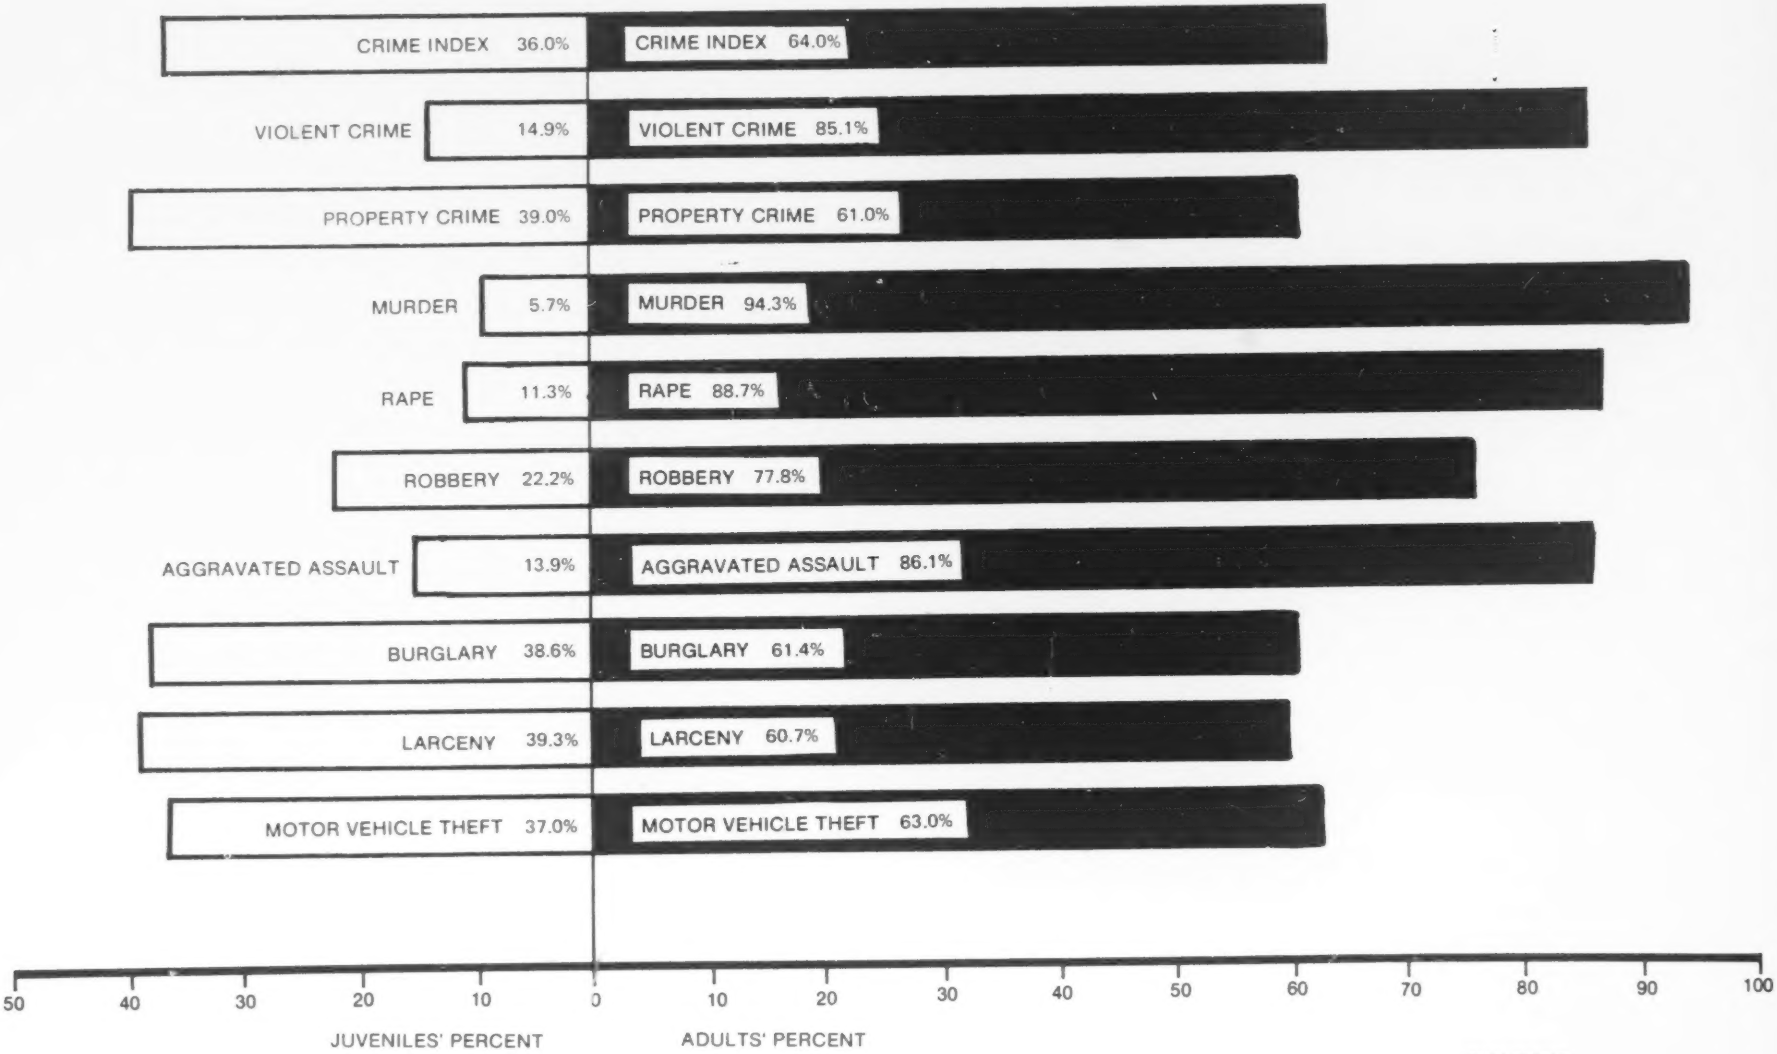

FIGURE 62

Tables XXII and XXIII display the percentage of Part I crimes cleared by arrest of juveniles by population categories and geographical districts, respectively. From Table XXII, it is evident that juvenile arrests account most frequently for clearances recorded in suburban cities (42.6%). In contrast, arrests of juveniles appear to least frequently account for clearances recorded by suburban sheriffs (11.7%) and university police (17.9%).

In the violent crime category, suburban cities again show the largest percentage of clearances accounted for by juvenile arrests (30.7%). Only 8.3% of the clearances of violent crimes reported by suburban sheriffs were cleared through juvenile arrests.

In the property crime category, suburban cities are again found to have a disproportionate frequency of clearances accounted for by juveniles (44.1%).

Geographical district data are shown in Table XXIII. It was in district 7 in which the highest percentage of juvenile clearances was found (50.4%). District 7 also had the highest juvenile percent of clearances in 1977 and 1978. District 2 had the lowest juvenile percent of 1979 clearances, 30.1%.

Table XXIV presents sex and race breakdowns for those arrested for Part I crimes during 1979. The table contains the following findings of note:

1. the percentage of females arrested is highest in the cities and lowest in the rural areas, as was the case in 1976, 1977, and 1978;
2. the percentage of whites arrested is highest in the rural areas and lowest in the cities, also consistent with data from prior years;
3. arrests of females are generally more frequent for property crimes than for violent crimes, with larceny in particular being the crime for which females are most frequently arrested; however, in 1979, females accounted for a larger percentage of robbery arrests than burglary arrests;
4. the crimes for which whites accounted for the highest percentage of arrests in 1979 were motor vehicle theft and burglary, as was the case in each of the preceding three years;

Sub-totals do not add up to totals because of overlapping in suburban and city categories.

5. the crimes for which blacks were over-represented were the violent crimes and, especially robbery.

The racial breakdown of arrests for 1979 is very similar to that found in 1976, 1977 and 1978, with whites being arrested more than other races in all areas. Blacks' highest percentages were found in the cities, while Native Americans and others were rarely arrested in any of the areas.

To obtain a better perception of the racial and sexual breakdown of arrests, Tables XXV and XXVI were prepared, presenting a distribution of Part I arrests for males and females respectively. These tables reinforce the idea that blacks are proportionately over-represented in arrests for violent crimes, especially robbery, and represented a smaller percentage of property crime arrests.

Table XXVII presents Part II arrests and percentages by sex and race, and is in a format similar to that found in Table XXIV. Females accounted for 13.1% of all Part II arrests in 1979, and made up a somewhat larger portion of city arrests (13.8%). In rural areas, females were the arrestees for Part II crimes only 9.6% of the time.

The Part II crimes for which females made up the largest proportion of arrests in 1979 were commercial vice, forgery, fraud, liquor law violations, and embezzlement. The offenses for which females were least frequently arrested were offenses against the family, sex offenses, illegal weapons, drunkenness, and illegal weapons.

Because of the small number of Native Americans and "Others" in Iowa, any patterns relating to their arrests for Part II offenses are difficult to find.

V. ASSAULTS ON LAW ENFORCEMENT OFFICERS

Information on assaults on law enforcement officers in Iowa reported during 1978 and 1979 is presented in Table XXVIII. Assaults are broken down into those resulting in injury and those not resulting in injury.

There were 1,078 assaults on peace officers reported in 1979, an increase of 37.3 percent over the 785 assaults reported on Iowa law enforcement officers in 1978. Most of the increase occurred in the category of assaults not resulting in injury to the officer, which rose 47.9 percent in 1979. There was a 5.6 percent increase in assaults resulting in injuries to the officer in 1979.

The largest percentage increases in assaults on law enforcement officers occurred in cities of 25,000 to 50,000 people (156.7 percent) and in cities of 5,000 to 10,000 population (137.5 percent). In interpreting these results, one should keep in mind the relatively small number of assaults in these categories.

Between 1978 and 1979, non-suburban cities experienced a marked increase in assaults on law enforcement officers (110.9%), while suburban cities had a decline of 15.1 percent. This was a reversal of the trend between 1977 and 1978, when suburban cities increased and non-suburban cities declined.

There were no law enforcement officers killed in the line of duty in Iowa during 1979, while three were killed in 1978.

TABLE XXVIII

ASSAULTS ON LAW ENFORCEMENT OFFICERS

INTRODUCTION. 1

GENERAL CRIME STATISTICS

Index of Crime, 1979 (Table 1). 2
Monthly Trend of Offenses, 1979 (Table 2) 26
Offenses Known, Crime Rates and Percent Cleared by Arrest by Population Categories, 1979 (Table 3) 27
Offenses Cleared by Arrest of Juveniles by Population Categories, Percent of Total Clearances, 1979 (Table 4) 34
Percent of Offenses Cleared by Arrest and Percent of Total Clearances Attributed to Juveniles by Geographical District and County, 1979 (Table 5) . 40
Offense Breakdowns, 1979 (Table 6). 48
Value of Property Stolen by Offense, 1979 (Table 7) 49
Type of Value of Property Stolen and Recovered, 1979 (Table 8). 50
Farm Theft by Population Category, 1979 (Table 9) 51

ARRESTS FOR PART I CRIMES

Monthly Trend of Part I Arrests, 1979 (Table 10). 54
Number and Rates by Population Categories, 1979 (Table 11). 55
Total by Age and Sex, 1979 (Table 12) 57
Total and Percentages by Race and Sex, 1979 (Table 13). 59
Total and Percentages for Adults by Race and Sex, 1979 (Table 14) 59

City Part I Arrests

By Age and Sex, 1979 (Table 15) 60
Arrests and Percentages by Race and Sex, 1979 (Table 16). 62
Adult Arrests and Percentages by Race and Sex, 1979 (Table 17). 62

Suburban Part I Arrests

By Age and Sex, 1979 (Table 18) 63
Arrests and Percentages by Race and Sex, 1979 (Table 19). 65
Adult Arrests and Percentages by Race and Sex, 1979 (Table 20). 65

Rural Part I Arrests

By Age and Sex, 1979 (Table 21) 66
Arrests and Percentages by Race and Sex, 1979 (Table 22). 68
Adult Arrests and Percentages by Race and Sex, 1979 (Table 23). 68

ARRESTS FOR PART II CRIMES

Monthly Trend of Part II Arrests, 1979 (Table 24) 70
Number and Rates by Reporting Agencies, 1979 (Table 25) 72
Number and Rates by Population Categories, 1979 (Table 26). 116
Total by Age and Sex, 1979 (Table 27) 120
Total and Percentages by Race and Sex, 1979 (Table 28). 124
Total and Percentages for Adults by Race and Sex, 1979 (Table 29) 125

Page

City Part II Arrests

By Age and Sex, 1979 (Table 30) 126
Arrests and Percentages by Race and Sex, 1979 (Table 31). 130
Adult Arrests and Percentages by Race and Sex, 1979 (Table 32). 131

Suburban Part II Arrests

By Age and Sex, 1979 (Table 33) 132
Arrests and Percentages by Race and Sex, 1979 (Table 34). 136
Adult Arrests and Percentages by Race and Sex, 1979 (Table 35). 137

Rural Part II Arrests

By Age and Sex, 1979 (Table 36) 138
Arrests and Percentages by Race and Sex, 1979 (Table 37). 142
Adult Arrests and Percentages by Race and Sex, 1979 (Table 38). 143

Controlled Substance Arrests

Adult Arrests by Population Categories, Substance Involved, Sale or Manufacture, 1979 (Table 39). 144
Adult Arrests by Population Categories, Substance Involved, Possession, 1979 (Table 40) 150

JUVENILE ARRESTS

Part I Arrests

Arrests and Rates by Reporting Agencies, 1979 (Table 41). 156
Arrests and Rates by Population Categories, 1979 (Table 42) 180
Total by Age and Sex, 1979 (Table 43) 182
Total and Percentages by Race and Sex, 1979 (Table 44). 183

City Arrests

By Age and Sex, 1979 (Table 45) 184
By Race and Sex, 1979 (Table 46). 185

Suburban Arrests

By Age and Sex, 1979 (Table 47) 186
By Race and Sex, 1979 (Table 48). 187

Rural Arrests

By Age and Sex, 1979 (Table 49) 188
By Race and Sex, 1979 (Table 50). 189

INTRODUCTION

This second volume of the 1979 Iowa Uniform Crime Reports presents computer printouts prepared for the Annual Release by the Data Services Bureau of the Department of Public Safety. These printouts contain, in tabular form, the raw data received from contributing agencies in 1979. Volume I contains a more analytical presentation of data, accompanied by text.

Additional copies of this volume may be obtained from the Research and Development Bureau of the Department of Public Safety.
